Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2006 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Accident prevention

Owner's Role in Construction Safety — Xinyu Huang and Jimmie Hinze; 132 (2), 164-73 (2006).

Owner's Role in Construction Safety: Guidance Model — Xinyu Huang and Jimmie Hinze; 132 (2), 174-81 (2006).

Scheduling-Based Risk Estimation and Safety Planning for Construction Projects — Kyoo-Jin Yi and David Langford; 132 (6), 626-35 (2006).

Accidents

Owner's Role in Construction Safety — Xinyu Huang and Jimmie Hinze; 132 (2), 164-73 (2006).

Analysis of Construction Worker Injuries That Do Not Result in Lost Time — Jimmie Hinze, Jenny N. Devenport, and Geneva Giang; 132 (3), 321-6 (2006).

Comparative Injury and Fatality Risk Analysis of Building Trades — Selim Baradan and Mumtaz A. Usmen; 132 (5), 533-9 (2006).

Physical Risk Factors and Controls for Musculoskeletal Disorders in Construction Trades — Peregrin Spielholz, Gary Davis, and Jason Griffith; 132 (10), 1059-68 (2006).

Airports

Minimizing Construction-Related Hazards in Airport Expansion Projects — Ahmed Khalafallah and Khaled El-Rayes; 132 (6), 562-72 (2006).

Algorithms

Parallel Genetic Algorithms for Optimizing Resource Utilization in Large-Scale Construction Projects — Amr Kandil and Khaled El-Rayes; 132 (5), 491-8 (2006).

Non-Unit-Based Planning and Scheduling of Repetitive Construction Projects — Rong-yau Huang and Kuo-Shun Sun; 132 (6), 585-97 (2006).

Identifying a Design Management Package to Support Concurrent Design in Building Wafer Fabrication Facilities — Ren-Jye Dzeng; 132 (6), 606-14 (2006).

Scheduling Construction Projects Using Evolutionary Algorithm — Piotr Jaśkowski and Anna Sobotka; 132 (8), 861-70 (2006).

Artificial intelligence

Classifying Construction Contractors Using Unsupervised-Learning Neural Networks — Ashraf M. Elazouni; 132 (12), 1242-53 (2006).

Asphalt pavements

Fast-Track Urban Freeway Rehabilitation with 55-H Weekend Closures: I-710 Long Beach Case Study — Eul-Bum Lee, Hojung Lee, and John T. Harvey; 132 (5), 465-72 (2006).

Assets

Markov-Based Optimization Model for Building Facilities Management — Xueqing Zhang; 132 (11), 1203-11 (2006).

Automation

Construction Business Automation System — Dong-Eun Lee and Jonathan J. Shi; 132 (1), 88-96 (2006).

Model for Automated Monitoring of Fall Hazards in Building Construction — R. Navon and O. Kolton; 132 (7), 733-40 (2006).

Residential Construction Lot Grading Approval Process Optimization: Case Study of City of Edmonton — Vishal Sharma, Mohamed Al-Hussein, and Simaan M. AbouRizk; 132 (12), 1225-33 (2006).

Bayesian analysis

Bayesian Updating Application into Simulation in the North Edmonton Sanitary Trunk Tunnel Project — Tae Hwan Chung, Yasser Mohamed, and Simaan AbouRizk; 132 (8), 882-94 (2006).

Benefits

Evaluation Model for Information Systems Benefits in Construction Management Processes — Jung-Ho Yu, Hyun-Soo Lee, and Wooyoung Kim; 132 (10), 1114-21 (2006).

Best management practice

Survey of the Construction Industry Relative to the Use of CPM Scheduling for Construction Projects — Patricia D. Galloway; 132 (7), 697-711 (2006).

Construction-Associated Solids Loads with a Temporary Sediment Control BMP — Theodore G. Cleveland and Adebola Fashokun; 132 (10), 1122-5 (2006).

Bids

Testing Vickery's Revenue Equivalence Theory in Construction Auctions — Derek S. Drew and Martin Skitmore; 132 (4), 425-8 (2006).

Soil Penetration Modeling in Microtunneling Projects — Mohamed Hegab, Gary R. Smith, and Ossama M. Salem; 132 (6), 598-605 (2006).

Exploratory Study of Knowledge Sharing in Contracting Companies: A Sociotechnical Perspective — Patrick Sik-wah Fong and Lily Chu; 132 (9), 928-39 (2006).

Exploring the Bidding Situation for Economically Most Advantageous Tender Projects Using a Bidding Game — Yeng-Horng Perng, Yi-Kai Juan, and Sheng-Fen Chien; 132 (10), 1037-42 (2006).

Bridge construction

Lessons Learned from an Emergency Bridge Replacement Project — Yong Bai, William R. Burkett, and Phillip T. Nash; 132 (4), 338-44 (2006).

Constructability Analysis of the Bridge Superstructure Rotation Construction Method in China — J. Zhang and T. E. El-Diraby; 132 (4), 353-62 (2006).

Crew Production Rates for Contract Time Estimation: Beam Erection, Deck, and Rail of Highway Bridges — James T. O'Connor and Youngki Huh; 132 (4), 408-15 (2006).

Rapid Bridge Replacement: Processes, Techniques, and Needs for Improvements — Yong Bai and William R. Burkett; 132 (11), 1139-47 (2006).

Bridge design

Rapid Bridge Replacement: Processes, Techniques, and Needs for Improvements — Yong Bai and William R. Burkett; 132 (11), 1139-47 (2006).

Bridges, highway

Lessons Learned from an Emergency Bridge Replacement Project — Yong Bai, William R. Burkett, and Phillip T. Nash; 132 (4), 338-44 (2006).

Crew Production Rates for Contract Time Estimation: Beam Erection, Deck, and Rail of Highway Bridges — James T. O'Connor and Youngki Huh; 132 (4), 408-15 (2006).

Rapid Bridge Replacement: Processes, Techniques, and Needs for Improvements — Yong Bai and William R. Burkett; 132 (11), 1139-47 (2006).

Buildings

Construction Delays and Their Causative Factors in Nigeria — Ajibade Ayodeji Aibinu and Henry Agboola Odeyinka; 132 (7), 667-77 (2006).

Buildings, public

Procurement Routes in Public Building and Construction Projects — Ola Lædre, Kjell Austeng, Tore I. Haugen, and Ole Jonny Klakegg; 132 (7), 689-96 (2006).

Buildings, residential

Residential Construction Lot Grading Approval Process Optimization: Case Study of City of Edmonton — Vishal Sharma, Mohamed Al-Hussein, and Simaan M. AbouRizk; 132 (12), 1225-33 (2006).

Business management

Construction Business Automation System — Dong-Eun Lee and Jonathan J. Shi; 132 (1), 88-96 (2006).

Determinants of International Architectural, Engineering, and Construction Firms' Project Success in China — Florence Yean Yng Ling, C. William Ibbs, and Wei Yee Hoo; 132 (2), 206-14 (2006).

Canada
Application of Lean Concepts and Simulation Analysis to Improve Efficiency of Drainage Operations Maintenance Crews — Albert Agbulos, Yasser Mohamed, Mohamed Al-Hussein, Simaan AbouRizk, and John Roesch; 132 (3), 291-9 (2006).

Residential Construction Lot Grading Approval Process Optimization: Case Study of City of Edmonton — Vishal Sharma, Mohamed Al-Hussein, and Simaan M. AbouRizk; 132 (12), 1225-33 (2006).

Capital costs
CAPM-Based Valuation of Financial Government Supports to Infeasible and Risky Private Infrastructure Projects — Andreas Wibowo; 132 (3), 239-48 (2006).

Modeling Cost Escalation in Large Infrastructure Projects — Ali Touran and Ramon Lopez; 132 (8), 853-60 (2006).

Case reports
Moving a Reinforced-Concrete Building: Case Study — Dory Telem, Aviad Shapira, Ytzhak D. Goren, and Cliff J. Schexnayder; 132 (2), 115-24 (2006).

Key Performance Indicators for Strategic Healthcare Facilities Maintenance — Igal M. Shohet; 132 (4), 345-52 (2006).

Contractor Key Competitiveness Indicators: A China Study — Li-Yin Shen, Wei-Sheng Lu, and Michael C. H. Yam; 132 (4), 416-24 (2006).

Safety Climate in Construction Industry: A Case Study in Hong Kong — Dongping Fang, Yang Chen, and Louisa Wong; 132 (6), 573-84 (2006).

Downside Risks in Construction Projects Developed by the Civil Service: The Case of Spain — M. Pilar de la Cruz, Alfredo del Caño, and Elisa de la Cruz; 132 (8), 844-52 (2006).

Modeling and Analyzing the Impact of Technology on Data Capture and Transfer Processes at Construction Sites: A Case Study — Burcu Akinci, Semiha Kiziltas, Esin Ergen, Itir Z. Karaesmen, and Fuat Keceli; 132 (11), 1148-57 (2006).

Residential Construction Lot Grading Approval Process Optimization: Case Study of City of Edmonton — Vishal Sharma, Mohamed Al-Hussein, and Simaan M. AbouRizk; 132 (12), 1225-33 (2006).

Change management
Reliability and Stability Buffering Approach: Focusing on the Issues of Errors and Changes in Concurrent Design and Construction Projects — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 132 (5), 452-64 (2006).

China
Determinants of International Architectural, Engineering, and Construction Firms' Project Success in China — Florence Yean Yng Ling, C. William Ibbs, and Wei Yee Hoo; 132 (2), 206-14 (2006).

Partnering Mechanism in Construction: An Empirical Study on the Chinese Construction Industry — Wenzhe Tang, Colin F. Duffield, and David M. Young; 132 (3), 217-29 (2006).

Constructability Analysis of the Bridge Superstructure Rotation Construction Method in China — J. Zhang and T. E. El-Diraby; 132 (4), 353-62 (2006).

Contractor Key Competitiveness Indicators: A China Study — Li-Yin Shen, Wei-Sheng Lu, and Michael C. H. Yam; 132 (4), 416-24 (2006).

Strengths, Weaknesses, Opportunities, and Threats for Foreign-Invested Construction Enterprises: A China Study — Li Yin Shen, Zhen Yu Zhao, and Derek S. Drew; 132 (9), 966-75 (2006).

Classification
Classifying Construction Contractors Using Unsupervised-Learning Neural Networks — Ashraf M. Elazouni; 132 (12), 1242-53 (2006).

Climatic changes
Safety Climate in Construction Industry: A Case Study in Hong Kong — Dongping Fang, Yang Chen, and Louisa Wong; 132 (6), 573-84 (2006).

Coastal management
The Gulf of Mexico Decommissioning Market — Mark J. Kaiser and Wumi O. Iledare; 132 (8), 815-26 (2006).

Communication
Use of a WBS Matrix to Improve Interface Management in Projects — David K. H. Chua and Myriam Godinot; 132 (1), 67-79 (2006).

Experimental Assessment of Wireless Construction Technologies — Suchart Nuntasunti and Leonhard E. Bernold; 132 (9), 1009-18 (2006).

Investigation of Critical Success Factors in Construction Project Briefing by Way of Content Analysis — Ann T. W. Yu, Qiping Shen, John Kelly, and Kirsty Hunter; 132 (11), 1178-86 (2006).

Approaches to Improving the Quality of Construction Drawings from Owner's Perspective — Zhili Gao, Russell C. Walters, Edward J. Jaselskis, and Terry J. Wipf; 132 (11), 1187-92 (2006).

Compensation
Procurement Routes in Public Building and Construction Projects — Ola Lædre, Kjell Austeng, Tore I. Haugen, and Ole Jonny Klakegg; 132 (7), 689-96 (2006).

Competition
Contractor Key Competitiveness Indicators: A China Study — Li-Yin Shen, Wei-Sheng Lu, and Michael C. H. Yam; 132 (4), 416-24 (2006).

Computation
Parallel Genetic Algorithms for Optimizing Resource Utilization in Large-Scale Construction Projects — Amr Kandil and Khaled El-Rayes; 132 (5), 491-8 (2006).

Minimizing Construction-Related Hazards in Airport Expansion Projects — Ahmed Khalafallah and Khaled El-Rayes; 132 (6), 562-72 (2006).

Computer aided design
Computer-Aided Site Layout Planning — Farnaz Sadeghpour, Osama Moselhi, and Sabah T. Alkass; 132 (2), 143-51 (2006).

Computer aided operation
Firm Performance and Information Technology Utilization in the Construction Industry — Mohammad El-Mashaleh, William J. O'Brien, and R. Edward Minchin; 132 (5), 499-507 (2006).

Computer aided scheduling
Work Continuity Constraints in Project Scheduling — Mario Vanhoucke; 132 (1), 14-25 (2006).

Object-Oriented Scheduling for Repetitive Projects with Soft Logics — Su-Ling Fan and H. P. Tserng; 132 (1), 35-48 (2006).

Parallel Genetic Algorithms for Optimizing Resource Utilization in Large-Scale Construction Projects — Amr Kandil and Khaled El-Rayes; 132 (5), 491-8 (2006).

Computer aided simulation
Application Framework for Mapping and Simulation of Waste Handling Processes in Construction — Ming Lu, Chi-Sun Poon, and Lap-Chi Wong; 132 (11), 1212-21 (2006).

Residential Construction Lot Grading Approval Process Optimization: Case Study of City of Edmonton — Vishal Sharma, Mohamed Al-Hussein, and Simaan M. AbouRizk; 132 (12), 1225-33 (2006).

Computer applications
Computerized System for Efficient Delivery of Infrastructure Maintenance/Repair Programs — Tarek Hegazy; 132 (1), 26-34 (2006).

Object-Oriented Scheduling for Repetitive Projects with Soft Logics — Su-Ling Fan and H. P. Tserng; 132 (1), 35-48 (2006).

Neural Networks for Estimating the Productivity of Concreting Activities — A. Samer Ezeldin and Lokman M. Sharara; 132 (6), 650-6 (2006).

Conflict Resolution in Construction Disputes Using the Graph Model — Moustafa Kassab, Keith Hipel, and Tarek Hegazy; 132 (10), 1043-52 (2006).

Computer models
Lighting Requirements for Nighttime Highway Construction — Khalied Hyari and Khaled El-Rayes; 132 (5), 435-43 (2006).

Parallel Genetic Algorithms for Optimizing Resource Utilization in Large-Scale Construction Projects — Amr Kandil and Khaled El-Rayes; 132 (5), 491-8 (2006).

Exploring the Bidding Situation for Economically Most Advantageous Tender Projects Using a Bidding Game — Yeng-Horng Perng, Yi-Kai Juan, and Sheng-Fen Chien; 132 (10), 1037-42 (2006).

Computer programming
Linear Programming Approach to Optimize Strategic Investment in the Construction Workforce — Issam M. Srour, Carl T. Haas, and David P. Morton; 132 (11), 1158-66 (2006).

Concrete
Neural Networks for Estimating the Productivity of Concreting Activities — A. Samer Ezeldin and Lokman M. Sharara; 132 (6), 650-6 (2006).

Concrete construction
Moving a Reinforced-Concrete Building: Case Study — Dory Telem, Aviad Shapira, Ytzhak D. Goren, and Cliff J. Schexnayder; 132 (2), 115-24 (2006).

Empirical Evaluation of Structural Frame Performance Criteria: Realizing the Potential of Hybrid Concrete Construction — R. Soetanto, A. R. J. Dainty, J. Glass, and A. D. F. Price; 132 (3), 278-90 (2006).

Concrete structures
Moving a Reinforced-Concrete Building: Case Study — Dory Telem, Aviad Shapira, Ytzhak D. Goren, and Cliff J. Schexnayder; 132 (2), 115-24 (2006).

Confidence intervals
Statistical Considerations for Predicting Residual Value of Heavy Equipment — Gunnar Lucko, Christine M. Anderson-Cook, and Michael C. Vorster; 132 (7), 723-32 (2006).

Conflicts
Critical Factors Affecting Schedule Performance: Evidence from Indian Construction Projects — K. C. Iyer and K. N. Jha; 132 (8), 871-81 (2006).

Conflict Resolution in Construction Disputes Using the Graph Model — Moustafa Kassab, Keith Hipel, and Tarek Hegazy; 132 (10), 1043-52 (2006).

Constructability
Constructability Analysis of the Bridge Superstructure Rotation Construction Method in China — J. Zhang and T. E. El-Diraby; 132 (4), 353-62 (2006).

Constructability State of Practice Report — James B. Pocock, Steven T. Kuennen, John Gambatese, and Jon Rauschkolb; 132 (4), 373-83 (2006).

Modeling of Functional Construction Requirements for Constructability Analysis — Yuanbin Song and David K. H. Chua; 132 (12), 1314-26 (2006).

Construction
Construction Delays in Hong Kong Civil Engineering Projects — Tommy Y. Lo, Ivan W. H. Fung, and Karen C. F. Tung; 132 (6), 636-49 (2006).

Construction companies
MAUT-Based Dispute Resolution Selection Model Prototype for International Construction Projects — Edwin H. W. Chan, Henry C. H. Suen, and Charles K. L. Chan; 132 (5), 444-51 (2006).

Firm Performance and Information Technology Utilization in the Construction Industry — Mohammad El-Mashaleh, William J. O'Brien, and R. Edward Minchin; 132 (5), 499-507 (2006).

Job Performance Evaluation for Construction Companies: An Analytic Network Process Approach — Eddie W. L. Cheng and Heng Li; 132 (8), 827-35 (2006).

Exploratory Study of Knowledge Sharing in Contracting Companies: A Sociotechnical Perspective — Patrick Sik-wah Fong and Lily Chu; 132 (9), 928-39 (2006).

Construction costs
Constructability Analysis of the Bridge Superstructure Rotation Construction Method in China — J. Zhang and T. E. El-Diraby; 132 (4), 353-62 (2006).

Firm Performance and Information Technology Utilization in the Construction Industry — Mohammad El-Mashaleh, William J. O'Brien, and R. Edward Minchin; 132 (5), 499-507 (2006).

Predicting Construction Cost Using Multiple Regression Techniques — David J. Lowe, Margaret W. Emsley, and Anthony Harding; 132 (7), 750-8 (2006).

Determining Attribute Weights in a CBR Model for Early Cost Prediction of Structural Systems — Sevgi Zeynep Doğan, David Arditi, and H. Murat Günaydın; 132 (10), 1092-8 (2006).

Construction equipment
Soil Penetration Modeling in Microtunneling Projects — Mohamed Hegab, Gary R. Smith, and Ossama M. Salem; 132 (6), 598-605 (2006).

Statistical Considerations for Predicting Residual Value of Heavy Equipment — Gunnar Lucko, Christine M. Anderson-Cook, and Michael C. Vorster; 132 (7), 723-32 (2006).

Systems Analysis of Technical Advancement in Earthmoving Equipment — C. B. Tatum, Michael Vorster, Mac G. Klingler, and Boyd C. Paulson; 132 (9), 976-86 (2006).

Innovations in Earthmoving Equipment: New Forms and Their Evolution — C. B. Tatum, Michael Vorster, and Mac Klingler; 132 (9), 987-97 (2006).

Construction industry
Relative Effectiveness of Project Delivery and Contract Strategies — Adetokunbo A. Oyetunji and Stuart D. Anderson; 132 (1), 3-13 (2006).

Computer-Aided Site Layout Planning — Farnaz Sadeghpour, Osama Moselhi, and Sabah T. Alkass; 132 (2), 143-51 (2006).

Proposed Subcontractor-Based Employee Motivational Model — Robert F. Cox, Raja R. A. Issa, and Aimee Frey; 132 (2), 152-63 (2006).

Owner's Role in Construction Safety: Guidance Model — Xinyu Huang and Jimmie Hinze; 132 (2), 174-81 (2006).

Partnering Mechanism in Construction: An Empirical Study on the Chinese Construction Industry — Wenzhe Tang, Colin F. Duffield, and David M. Young; 132 (3), 217-29 (2006).

Comparing Procurement Methods for Design-Build Projects — Marwa A. El Wardani, John I. Messner, and Michael J. Horman; 132 (3), 230-8 (2006).

Analysis of Construction Worker Injuries That Do Not Result in Lost Time — Jimmie Hinze, Jenny N. Devenport, and Geneva Giang; 132 (3), 321-6 (2006).

Examining the Business Impact of Owner Commitment to Sustainability — Salwa M. A. Beheiry, Wai Kiong Chong, and Carl T. Haas; 132 (4), 384-92 (2006).

Contractor Key Competitiveness Indicators: A China Study — Li-Yin Shen, Wei-Sheng Lu, and Michael C. H. Yam; 132 (4), 416-24 (2006).

Testing Vickery's Revenue Equivalence Theory in Construction Auctions — Derek S. Drew and Martin Skitmore; 132 (4), 425-8 (2006).

MAUT-Based Dispute Resolution Selection Model Prototype for International Construction Projects — Edwin H. W. Chan, Henry C. H. Suen, and Charles K. L. Chan; 132 (5), 444-51 (2006).

Prototype System for Knowledge Problem Definition — Ahmed M. Al-Ghassani, John M. Kamara, Chimay J. Anumba, and Patricia M. Carrillo; 132 (5), 516-24 (2006).

Motivational Climate of Construction Apprentice — Benjamin Obinero Uwakweh; 132 (5), 525-32 (2006).

Comparative Injury and Fatality Risk Analysis of Building Trades — Selim Baradan and Mumtaz A. Usmen; 132 (5), 533-9 (2006).

Developing a Complexity Measure for Project Schedules — Khaled M. Nassar and Mohamed Y. Hegab; 132 (6), 554-61 (2006).

Safety Climate in Construction Industry: A Case Study in Hong Kong — Dongping Fang, Yang Chen, and Louisa Wong; 132 (6), 573-84 (2006).

Non-Unit-Based Planning and Scheduling of Repetitive Construction Projects — Rong-yau Huang and Kuo-Shun Sun; 132 (6), 585-97 (2006).

Comparative Study of University Courses on Critical-Path Method Scheduling — Patricia D. Galloway; 132 (7), 712-22 (2006).

Price and Nonprice Criteria for Contractor Selection — F. Waara and J. Bröchner; 132 (8), 797-804 (2006).

Job Performance Evaluation for Construction Companies: An Analytic Network Process Approach — Eddie W. L. Cheng and Heng Li; 132 (8), 827-35 (2006).

Critical Factors Affecting Schedule Performance: Evidence from Indian Construction Projects — K. C. Iyer and K. N. Jha; 132 (8), 871-81 (2006).

Crane-Related Fatalities in the Construction Industry — J. E. Beavers, J. R. Moore, R. Rinehart, and W. R. Schriver; 132 (9), 901-10 (2006).

Tracking the Location of Materials on Construction Job Sites — Jongchul Song, Carl T. Haas, and Carlos H. Caldas; 132 (9), 911-8 (2006).

Case-Based Reasoning Model for International Market Selection — Beliz Ozorhon, Irem Dikmen, and M. Talat Birgonul; 132 (9), 940-8 (2006).

Strengths, Weaknesses, Opportunities, and Threats for Foreign-Invested Construction Enterprises: A China Study — Li Yin Shen, Zhen Yu Zhao, and Derek S. Drew; 132 (9), 966-75 (2006).

Contractor Selection Criteria: Investigation of Opinions of Singapore Construction Practitioners — D. Singh and Robert L. K. Tiong; 132 (9), 998-1008 (2006).

Exploring the Bidding Situation for Economically Most Advantageous Tender Projects Using a Bidding Game — Yeng-Horng Perng, Yi-Kai Juan, and Sheng-Fen Chien; 132 (10), 1037-42 (2006).

What Does the Construction Industry Value in Its Workers? — Issam M. Srour, Carl T. Haas, and John D. Borcherding; 132 (10), 1053-8 (2006).

Physical Risk Factors and Controls for Musculoskeletal Disorders in Construction Trades — Peregrin Spielholz, Gary Davis, and Jason Griffith; 132 (10), 1059-68 (2006).

Lean Processes for Sustainable Project Delivery — Anthony R. Lapinski, Michael J. Horman, and David R. Riley; 132 (10), 1083-91 (2006).

Construction-Associated Solids Loads with a Temporary Sediment Control BMP — Theodore G. Cleveland and Adebola Fashokun; 132 (10), 1122-5 (2006).

Construction Delivery Systems: A Comparative Analysis of Their Performance within School Districts — David Col Debella and Robert Ries; 132 (11), 1131-8 (2006).

Linear Programming Approach to Optimize Strategic Investment in the Construction Workforce — Issam M. Srour, Carl T. Haas, and David P. Morton; 132 (11), 1158-66 (2006).

Investigation of Critical Success Factors in Construction Project Briefing by Way of Content Analysis — Ann T. W. Yu, Qiping Shen, John

Kelly, and Kirsty Hunter; 132 (11), 1178-86 (2006).

Decision Tree Modeling Using Integrated Multilevel Stochastic Networks — Mohamed Moussa, Janaka Ruwanpura, and George Jergeas; 132 (12), 1254-66 (2006).

Quantitative Measurement of Successful Performance from the Project Manager's Perspective — Cindy L. Menches and Awad S. Hanna; 132 (12), 1284-93 (2006).

Multiproject Planning and Resource Controls for Facility Management — E. William East and Liang Y. Liu; 132 (12), 1294-305 (2006).

Construction management

Work Continuity Constraints in Project Scheduling — Mario Vanhoucke; 132 (1), 14-25 (2006).

Computerized System for Efficient Delivery of Infrastructure Maintenance/Repair Programs — Tarek Hegazy; 132 (1), 26-34 (2006).

Object-Oriented Scheduling for Repetitive Projects with Soft Logics — Su-Ling Fan and H. P. Tserng; 132 (1), 35-48 (2006).

Total Quality Performance of Design/Build Firms Using Quality Function Deployment — Dong-Eun Lee and David Arditi; 132 (1), 49-57 (2006).

Use of a WBS Matrix to Improve Interface Management in Projects — David K. H. Chua and Myriam Godinot; 132 (1), 67-79 (2006).

Success/Failure Factors and Performance Measures of Web-Based Construction Project Management Systems: Professionals' Viewpoint — Pollaphat Nitithamyong and Mirosław J. Skibniewski; 132 (1), 80-7 (2006).

Construction Business Automation System — Dong-Eun Lee and Jonathan J. Shi; 132 (1), 88-96 (2006).

Fundamental Principles of Workforce Management — H. Randolph Thomas and Michael J. Horman; 132 (1), 97-104 (2006).

Delay Mitigation in the Malaysian Construction Industry — H. Abdul-Rahman, M. A. Berawi, A. R. Berawi, O. Mohamed, M. Othman, and I. A. Yahya; 132 (2), 125-33 (2006).

3D Scan Information Management System for Construction Management — Naai-Jung Shih and Sen-Tien Huang; 132 (2), 134-42 (2006).

Effects of Schedule Pressure on Construction Performance — Madhav Prasad Nepal, Moonseo Park, and Bosik Son; 132 (2), 182-8 (2006).

Contractor Process Improvement for Enhancing Construction Productivity — David S. Cottrell; 132 (2), 189-96 (2006).

Determinants of International Architectural, Engineering, and Construction Firms' Project Success in China — Florence Yean Yng Ling, C. William Ibbs, and Wei Yee Hoo; 132 (2), 206-14 (2006).

Particle Swarm Optimization for Preemptive Scheduling under Break and Resource-Constraints — Hong Zhang, Heng Li, and C. M. Tam; 132 (3), 259-67 (2006).

Automated Statistical Analysis in Stochastic Project Scheduling Simulation — Dong-Eun Lee and David Arditi; 132 (3), 268-77 (2006).

Sequence Planning for Electrical Construction — Michael J. Horman, Matthew P. Orosz, and David R. Riley; 132 (4), 363-72 (2006).

Constructability State of Practice Report — James B. Pocock, Steven T. Kuennen, John Gambatese, and Jon Rauschkolb; 132 (4), 373-83 (2006).

Developing a Resource Supply Chain Planning System for Construction Projects — H. Ping Tserng, Samuel Y. L. Yin, and Sherman Li; 132 (4), 393-407 (2006).

Fast-Track Urban Freeway Rehabilitation with 55-H Weekend Closures: I-710 Long Beach Case Study — Eul-Bum Lee, Hojung Lee, and John T. Harvey; 132 (5), 465-72 (2006).

Critical Space Analysis — Graham M. Winch and Steve North; 132 (5), 473-81 (2006).

Application of Dependency Structure Matrix for Activity Sequencing in Concurrent Engineering Projects — J. Uma Maheswari, Koshy Varghese, and T. Sridharan; 132 (5), 482-90 (2006).

Parallel Genetic Algorithms for Optimizing Resource Utilization in Large-Scale Construction Projects — Amr Kandil and Khaled El-Rayes; 132 (5), 491-8 (2006).

Firm Performance and Information Technology Utilization in the Construction Industry — Mohammad El-Mashaleh, William J. O'Brien, and R. Edward Minchin; 132 (5), 499-507 (2006).

Using GPS to Measure the Impact of Construction Activities on Rural Interstates — Camilo Garcia, Ryan Huebschman, Dulcy M. Abraham, and Darcy M. Bullock; 132 (5), 508-15 (2006).

Identifying a Design Management Package to Support Concurrent Design in Building Wafer Fabrication Facilities — Ren-Jye Dzeng; 132 (6), 606-14 (2006).

Management and Construction of the Three Gorges Project — Huichao Dai, Guangjing Cao, and Huaizhi Su; 132 (6), 615-9 (2006).

Scheduling-Based Risk Estimation and Safety Planning for Construction Projects — Kyoo-Jin Yi and David Langford; 132 (6), 626-35 (2006).

Construction Delays and Their Causative Factors in Nigeria — Ajibade Ayodeji Aibinu and Henry Agboola Odeyinka; 132 (7), 667-77 (2006).

Procurement Routes in Public Building and Construction Projects — Ola Lædre, Kjell Austeng, Tore I. Haugen, and Ole Jonny Klakegg; 132 (7), 689-96 (2006).

Survey of the Construction Industry Relative to the Use of CPM Scheduling for Construction Projects — Patricia D. Galloway; 132 (7), 697-711 (2006).

Using Global Positioning System to Improve Materials-Locating Processes on Industrial Projects — Carlos H. Caldas, David Grau Torrent, and Carl T. Haas; 132 (7), 741-9 (2006).

Economic Value of Building Faster — Kenneth Reinschmidt and David Trejo; 132 (7), 759-66 (2006).

Paving the Way to the Vision of Digital Construction: A Strategic Roadmap — Yacine Rezgui and Alain Zarli; 132 (7), 767-76 (2006).

Multimodal Image Retrieval from Construction Databases and Model-Based Systems — Ioannis Brilakis and Lucio Soibelman; 132 (7), 777-85 (2006).

Structural Insulated Panels: Impact on the Residential Construction Process — Michael A. Mullens and Mohammed Arif; 132 (7), 786-94 (2006).

A Study of Styles and Outcomes in Construction Dispute Negotiation — Sai On Cheung, Tak Wing Yiu Yiu, and Sau Fung Yeung; 132 (8), 805-14 (2006).

Improving the Safety and Efficiency of Materials Transfer at a Construction Site by Using an Elevator — Pia Perttula, Pekka Korhonen, Jouni Lehtelä, Pirkko-Liisa Rasa, Jari-Pekka Kitinoja, Simo Mäkimattila, and Timo Leskinen; 132 (8), 836-43 (2006).

Downside Risks in Construction Projects Developed by the Civil Service: The Case of Spain — M. Pilar de la Cruz, Alfredo del Caño, and Elisa de la Cruz; 132 (8), 844-52 (2006).

Scheduling Construction Projects Using Evolutionary Algorithm — Piotr Jaśkowski and Anna Sobotka; 132 (8), 861-70 (2006).

Tracking the Location of Materials on Construction Job Sites — Jongchul Song, Carl T. Haas, and Carlos H. Caldas; 132 (9), 911-8 (2006).

Logistic Likelihood Analysis of Mediation Outcomes — Tak Wing Yiu, Sai On Cheung, and Fung Man Mok; 132 (10), 1026-36 (2006).

Conflict Resolution in Construction Disputes Using the Graph Model — Moustafa Kassab, Keith Hipel, and Tarek Hegazy; 132 (10), 1043-52 (2006).

Stimulating Construction Innovation in Singapore through the National System of Innovation — Lim Jay Na, George Ofori, and Moonseo Park; 132 (10), 1069-82 (2006).

Evaluation Model for Information Systems Benefits in Construction Management Processes — Jung-Ho Yu, Hyun-Soo Lee, and Wooyoung Kim; 132 (10), 1114-21 (2006).

Only Dynamics Can Absorb Dynamics — Dory Telem, Alexander Laufer, and Aviad Shapira; 132 (11), 1167-77 (2006).

Investigation of Critical Success Factors in Construction Project Briefing by Way of Content Analysis — Ann T. W. Yu, Qiping Shen, John Kelly, and Kirsty Hunter; 132 (11), 1178-86 (2006).

Approaches to Improving the Quality of Construction Drawings from Owner's Perspective — Zhili Gao, Russell C. Walters, Edward J. Jaselskis, and Terry J. Wipf; 132 (11), 1187-92 (2006).

Application Framework for Mapping and Simulation of Waste Handling Processes in Construction — Ming Lu, Chi-Sun Poon, and Lap-Chi Wong; 132 (11), 1212-21 (2006).

Integration of Construction As-Built Data Via Laser Scanning with Geotechnical Monitoring of Urban Excavation — Y. Y. Su, Y. M. A. Hashash, and L. Y. Liu; 132 (12), 1234-41 (2006).

Particle Swarm Optimization-Supported Simulation for Construction Operations — Hong Zhang, C. M. Tam, Heng Li, and Jonathan Jingsheng Shi; 132 (12), 1267-74 (2006).

Conceptual Planning Process for Electrical Construction — Cindy L. Menches and Awad S. Hanna; 132 (12), 1306-13 (2006).

Modeling of Functional Construction Requirements for Constructability Analysis — Yuanbin Song and David K. H. Chua; 132 (12), 1314-26 (2006).

Construction materials
Developing a Resource Supply Chain Planning System for Construction Projects — H. Ping Tserng, Samuel Y. L. Yin, and Sherman Li; 132 (4), 393-407 (2006).

Using Global Positioning System to Improve Materials-Locating Processes on Industrial Projects — Carlos H. Caldas, David Grau Torrent, and Carl T. Haas; 132 (7), 741-9 (2006).

Improving the Safety and Efficiency of Materials Transfer at a Construction Site by Using an Elevator — Pia Perttula, Pekka Korhonen, Jouni Lehtelä, Pirkko-Liisa Rasa, Jari-Pekka Kitinoja, Simo Mäkimattila, and Timo Leskinen; 132 (8), 836-43 (2006).

Tracking the Location of Materials on Construction Job Sites — Jongchul Song, Carl T. Haas, and Carlos H. Caldas; 132 (9), 911-8 (2006).

Construction methods
Safety Hazard Identification on Construction Projects — Gregory Carter and Simon D. Smith; 132 (2), 197-205 (2006).

Constructability Analysis of the Bridge Superstructure Rotation Construction Method in China — J. Zhang and T. E. El-Diraby; 132 (4), 353-62 (2006).

Construction sites
Minimizing Construction-Related Hazards in Airport Expansion Projects — Ahmed Khalafallah and Khaled El-Rayes; 132 (6), 562-72 (2006).

Scheduling-Based Risk Estimation and Safety Planning for Construction Projects — Kyoo-Jin Yi and David Langford; 132 (6), 626-35 (2006).

Model for Automated Monitoring of Fall Hazards in Building Construction — R. Navon and O. Kolton; 132 (7), 733-40 (2006).

Only Dynamics Can Absorb Dynamics — Dory Telem, Alexander Laufer, and Aviad Shapira; 132 (11), 1167-77 (2006).

Contract management
Owner's Role in Construction Safety — Xinyu Huang and Jimmie Hinze; 132 (2), 164-73 (2006).

Management and Construction of the Three Gorges Project — Huichao Dai, Guangjing Cao, and Huaizhi Su; 132 (6), 615-9 (2006).

Model for Financial Renegotiation in Public-Private Partnership Projects and Its Policy Implications: Game Theoretic View — S. Ping Ho; 132 (7), 678-88 (2006).

Downside Risks in Construction Projects Developed by the Civil Service: The Case of Spain — M. Pilar de la Cruz, Alfredo del Caño, and Elisa de la Cruz; 132 (8), 844-52 (2006).

Contractors
Contractor Process Improvement for Enhancing Construction Productivity — David S. Cottrell; 132 (2), 189-96 (2006).

Sequence Planning for Electrical Construction — Michael J. Horman, Matthew P. Orosz, and David R. Riley; 132 (4), 363-72 (2006).

Contractor Key Competitiveness Indicators: A China Study — Li-Yin Shen, Wei-Sheng Lu, and Michael C. H. Yam; 132 (4), 416-24 (2006).

Procurement Routes in Public Building and Construction Projects — Ola Lædre, Kjell Austeng, Tore I. Haugen, and Ole Jonny Klakegg; 132 (7), 689-96 (2006).

Price and Nonprice Criteria for Contractor Selection — F. Waara and J. Bröchner; 132 (8), 797-804 (2006).

Contractor Selection Criteria: Investigation of Opinions of Singapore Construction Practitioners — D. Singh and Robert L. K. Tiong; 132 (9), 998-1008 (2006).

Classifying Construction Contractors Using Unsupervised-Learning Neural Networks — Ashraf M. Elazouni; 132 (12), 1242-53 (2006).

Conceptual Planning Process for Electrical Construction — Cindy L. Menches and Awad S. Hanna; 132 (12), 1306-13 (2006).

Contracts
Relative Effectiveness of Project Delivery and Contract Strategies — Adetokunbo A. Oyetunji and Stuart D. Anderson; 132 (1), 3-13 (2006).

Public Clients' Best Value Perspectives of Public Private Partnerships in Infrastructure Development — Xueqing Zhang; 132 (2), 107-14 (2006).

Owner's Role in Construction Safety: Guidance Model — Xinyu Huang and Jimmie Hinze; 132 (2), 174-81 (2006).

Crew Production Rates for Contract Time Estimation: Beam Erection, Deck, and Rail of Highway Bridges — James T. O'Connor and Youngki Huh; 132 (4), 408-15 (2006).

Testing Vickery's Revenue Equivalence Theory in Construction Auctions — Derek S. Drew and Martin Skitmore; 132 (4), 425-8 (2006).

Parallel Genetic Algorithms for Optimizing Resource Utilization in Large-Scale Construction Projects — Amr Kandil and Khaled El-Rayes; 132 (5), 491-8 (2006).

Soil Penetration Modeling in Microtunneling Projects — Mohamed Hegab, Gary R. Smith, and Ossama M. Salem; 132 (6), 598-605 (2006).

Model for Financial Renegotiation in Public-Private Partnership Projects and Its Policy Implications: Game Theoretic View — S. Ping Ho; 132 (7), 678-88 (2006).

Procurement Routes in Public Building and Construction Projects — Ola Lædre, Kjell Austeng, Tore I. Haugen, and Ole Jonny Klakegg; 132 (7), 689-96 (2006).

Downside Risks in Construction Projects Developed by the Civil Service: The Case of Spain — M. Pilar de la Cruz, Alfredo del Caño, and Elisa de la Cruz; 132 (8), 844-52 (2006).

Exploratory Study of Knowledge Sharing in Contracting Companies: A Sociotechnical Perspective — Patrick Sik-wah Fong and Lily Chu; 132 (9), 928-39 (2006).

Control methods
Model for Automated Monitoring of Fall Hazards in Building Construction — R. Navon and O. Kolton; 132 (7), 733-40 (2006).

Control systems
Systems Analysis of Technical Advancement in Earthmoving Equipment — C. B. Tatum, Michael Vorster, Mac G. Klingler, and Boyd C. Paulson; 132 (9), 976-86 (2006).

Cost control
Fundamental Principles of Workforce Management — H. Randolph Thomas and Michael J. Horman; 132 (1), 97-104 (2006).

Offshore Decommissioning Cost Estimation in the Gulf of Mexico — Mark J. Kaiser; 132 (3), 249-58 (2006).

Examining the Business Impact of Owner Commitment to Sustainability — Salwa M. A. Beheiry, Wai Kiong Chong, and Carl T. Haas; 132 (4), 384-92 (2006).

Minimizing Construction-Related Hazards in Airport Expansion Projects — Ahmed Khalafallah and Khaled El-Rayes; 132 (6), 562-72 (2006).

Modeling Cost Escalation in Large Infrastructure Projects — Ali Touran and Ramon Lopez; 132 (8), 853-60 (2006).

Physical Risk Factors and Controls for Musculoskeletal Disorders in Construction Trades — Peregrin Spielholz, Gary Davis, and Jason Griffith; 132 (10), 1059-68 (2006).

Cost estimates
Determining Attribute Weights in a CBR Model for Early Cost Prediction of Structural Systems — Sevgi Zeynep Doğan, David Arditi, and H. Murat Günaydın; 132 (10), 1092-8 (2006).

Cost management
Statistical Considerations for Predicting Residual Value of Heavy Equipment — Gunnar Lucko, Christine M. Anderson-Cook, and Michael C. Vorster; 132 (7), 723-32 (2006).

Costs
Forecasting Project Status by Using Fuzzy Logic — J. Li, O. Moselhi, and S. Alkass; 132 (11), 1193-202 (2006).

Cranes
Crane-Related Fatalities in the Construction Industry — J. E. Beavers, J. R. Moore, R. Rinehart, and W. R. Schriver; 132 (9), 901-10 (2006).

Critical path method
Work Continuity Constraints in Project Scheduling — Mario Vanhoucke; 132 (1), 14-25 (2006).

Automated Statistical Analysis in Stochastic Project Scheduling Simulation — Dong-Eun Lee and David Arditi; 132 (3), 268-77 (2006).

Critical Space Analysis — Graham M. Winch and Steve North; 132 (5), 473-81 (2006).

Curricula
Comparative Study of University Courses on Critical-Path Method Scheduling — Patricia D. Galloway; 132 (7), 712-22 (2006).

Damage assessments
Lessons Learned from an Emergency Bridge Replacement Project — Yong Bai, William R. Burkett, and Phillip T. Nash; 132 (4), 338-44 (2006).

Data analysis
Statistical Considerations for Predicting Residual Value of Heavy Equipment — Gunnar Lucko, Christine M. Anderson-Cook, and Michael C. Vorster; 132 (7), 723-32 (2006).

Multimodal Image Retrieval from Construction Databases and Model-Based Systems — Ioannis Brilakis and Lucio Soibelman; 132 (7), 777-85 (2006).

Integration of Construction As-Built Data Via Laser Scanning with Geotechnical Monitoring of Urban Excavation — Y. Y. Su, Y. M. A. Hashash, and L. Y. Liu; 132 (12), 1234-41 (2006).

Data collection
Moving a Reinforced-Concrete Building: Case

Study — Dory Telem, Aviad Shapira, Ytzhak D. Goren, and Cliff J. Schexnayder; 132 (2), 115-24 (2006).

Model for Automated Monitoring of Fall Hazards in Building Construction — R. Navon and O. Kolton; 132 (7), 733-40 (2006).

Using Global Positioning System to Improve Materials-Locating Processes on Industrial Projects — Carlos H. Caldas, David Grau Torrent, and Carl T. Haas; 132 (7), 741-9 (2006).

Modeling and Analyzing the Impact of Technology on Data Capture and Transfer Processes at Construction Sites: A Case Study — Burcu Akinci, Semiha Kiziltas, Esin Ergen, Itir Z. Karaesmen, and Fuat Keceli; 132 (11), 1148-57 (2006).

Integration of Construction As-Built Data Via Laser Scanning with Geotechnical Monitoring of Urban Excavation — Y. Y. Su, Y. M. A. Hashash, and L. Y. Liu; 132 (12), 1234-41 (2006).

Databases

Multimodal Image Retrieval from Construction Databases and Model-Based Systems — Ioannis Brilakis and Lucio Soibelman; 132 (7), 777-85 (2006).

Decision making

Relative Effectiveness of Project Delivery and Contract Strategies — Adetokunbo A. Oyetunji and Stuart D. Anderson; 132 (1), 3-13 (2006).

Infrastructure Development and Expansion under Uncertainty: A Risk-Preference-Based Lattice Approach — Tong Zhao and Chung C. Fu; 132 (6), 620-5 (2006).

Contractor Selection Criteria: Investigation of Opinions of Singapore Construction Practitioners — D. Singh and Robert L. K. Tiong; 132 (9), 998-1008 (2006).

Determining Attribute Weights in a CBR Model for Early Cost Prediction of Structural Systems — Sevgi Zeynep Doğan, David Arditi, and H. Murat Günaydın; 132 (10), 1092-8 (2006).

Entropy Application to Improve Construction Finance Decisions — C. M. Tang, A. Y. T. Leung, and K. C. Lam; 132 (10), 1099-113 (2006).

Decision Tree Modeling Using Integrated Multilevel Stochastic Networks — Mohamed Moussa, Janaka Ruwanpura, and George Jergeas; 132 (12), 1254-66 (2006).

Construction IT Decision Making Using Multiattribute Utility Theory for Use in a Laboratory Information Management System — Tarek Elmisalami, Russell Walters, and Edward J. Jaselskis; 132 (12), 1275-83 (2006).

Decision support systems

Computer-Aided Site Layout Planning — Farnaz Sadeghpour, Osama Moselhi, and Sabah T. Alkass; 132 (2), 143-51 (2006).

Conflict Resolution in Construction Disputes Using the Graph Model — Moustafa Kassab, Keith Hipel, and Tarek Hegazy; 132 (10), 1043-52 (2006).

Determining Attribute Weights in a CBR Model for Early Cost Prediction of Structural Systems — Sevgi Zeynep Doğan, David Arditi, and H. Murat Günaydın; 132 (10), 1092-8 (2006).

Decommissioning

Offshore Decommissioning Cost Estimation in the Gulf of Mexico — Mark J. Kaiser; 132 (3), 249-58 (2006).

The Gulf of Mexico Decommissioning Market — Mark J. Kaiser and Wumi O. Iledare; 132 (8), 815-26 (2006).

Delay time

Delay Mitigation in the Malaysian Construction Industry — H. Abdul-Rahman, M. A. Berawi, A. R. Berawi, O. Mohamed, M. Othman, and I. A. Yahya; 132 (2), 125-33 (2006).

Construction Delays in Hong Kong Civil Engineering Projects — Tommy Y. Lo, Ivan W. H. Fung, and Karen C. F. Tung; 132 (6), 636-49 (2006).

Construction Delays and Their Causative Factors in Nigeria — Ajibade Ayodeji Aibinu and Henry Agboola Odeyinka; 132 (7), 667-77 (2006).

Delivery

Relative Effectiveness of Project Delivery and Contract Strategies — Adetokunbo A. Oyetunji and Stuart D. Anderson; 132 (1), 3-13 (2006).

Computerized System for Efficient Delivery of Infrastructure Maintenance/Repair Programs — Tarek Hegazy; 132 (1), 26-34 (2006).

Comparing Procurement Methods for Design-Build Projects — Marwa A. El Wardani, John I. Messner, and Michael J. Horman; 132 (3), 230-8 (2006).

Lean Processes for Sustainable Project Delivery — Anthony R. Lapinski, Michael J. Horman, and David R. Riley; 132 (10), 1083-91 (2006).

Construction Delivery Systems: A Comparative Analysis of Their Performance within School Districts — David Col Debella and Robert Ries; 132 (11), 1131-8 (2006).

Design

Constructability State of Practice Report — James B. Pocock, Steven T. Kuennen, John Gambatese, and Jon Rauschkolb; 132 (4), 373-83 (2006).

Identifying a Design Management Package to Support Concurrent Design in Building Wafer Fabrication Facilities — Ren-Jye Dzeng; 132 (6), 606-14 (2006).

Procurement Routes in Public Building and Construction Projects — Ola Lædre, Kjell Austeng, Tore I. Haugen, and Ole Jonny Klakegg; 132 (7), 689-96 (2006).

Design/build

Total Quality Performance of Design/Build Firms Using Quality Function Deployment — Dong-Eun Lee and David Arditi; 132 (1), 49-57 (2006).

Comparing Procurement Methods for Design-Build Projects — Marwa A. El Wardani, John I. Messner, and Michael J. Horman; 132 (3), 230-8 (2006).

Constructability State of Practice Report — James B. Pocock, Steven T. Kuennen, John Gambatese, and Jon Rauschkolb; 132 (4), 373-83 (2006).

Deterioration

Markov-Based Optimization Model for Building Facilities Management — Xueqing Zhang; 132 (11), 1203-11 (2006).

Developing countries

Neural Networks for Estimating the Productivity of Concreting Activities — A. Samer Ezeldin and Lokman M. Sharara; 132 (6), 650-6 (2006).

Diaphragm wall

Innovative Central Opening Strut System for Foundation Excavation — Min-Lung Yang, Sheng-Jin Chen, and Shun-Tyan Chen; 132 (1), 58-66 (2006).

Diesel fuels

Systems Analysis of Technical Advancement in Earthmoving Equipment — C. B. Tatum, Michael Vorster, Mac G. Klingler, and Boyd C. Paulson; 132 (9), 976-86 (2006).

Digital techniques

Paving the Way to the Vision of Digital Construction: A Strategic Roadmap — Yacine Rezgui and Alain Zarli; 132 (7), 767-76 (2006).

Dispute resolution

MAUT-Based Dispute Resolution Selection Model Prototype for International Construction Projects — Edwin H. W. Chan, Henry C. H. Suen, and Charles K. L. Chan; 132 (5), 444-51 (2006).

A Study of Styles and Outcomes in Construction Dispute Negotiation — Sai On Cheung, Tak Wing Yiu Yiu, and Sau Fung Yeung; 132 (8), 805-14 (2006).

Logistic Likelihood Analysis of Mediation Outcomes — Tak Wing Yiu, Sai On Cheung, and Fung Man Mok; 132 (10), 1026-36 (2006).

Conflict Resolution in Construction Disputes Using the Graph Model — Moustafa Kassab, Keith Hipel, and Tarek Hegazy; 132 (10), 1043-52 (2006).

Drafting

Approaches to Improving the Quality of Construction Drawings from Owner's Perspective — Zhili Gao, Russell C. Walters, Edward J. Jaselskis, and Terry J. Wipf; 132 (11), 1187-92 (2006).

Drainage systems

Application of Lean Concepts and Simulation Analysis to Improve Efficiency of Drainage Operations Maintenance Crews — Albert Agbulos, Yasser Mohamed, Mohamed Al-Hussein, Simaan AbouRizk, and John Roesch; 132 (3), 291-9 (2006).

Dynamic characteristics

Only Dynamics Can Absorb Dynamics — Dory Telem, Alexander Laufer, and Aviad Shapira; 132 (11), 1167-77 (2006).

Earthwork

Systems Analysis of Technical Advancement in Earthmoving Equipment — C. B. Tatum, Michael Vorster, Mac G. Klingler, and Boyd C. Paulson; 132 (9), 976-86 (2006).

Innovations in Earthmoving Equipment: New Forms and Their Evolution — C. B. Tatum, Michael Vorster, and Mac Klingler; 132 (9), 987-97 (2006).

Economic factors

Statistical Considerations for Predicting Residual Value of Heavy Equipment — Gunnar Lucko, Christine M. Anderson-Cook, and Michael C. Vorster; 132 (7), 723-32 (2006).

Economic Value of Building Faster — Kenneth Reinschmidt and David Trejo; 132 (7), 759-66 (2006).

Exploring the Bidding Situation for Economically Most Advantageous Tender Projects Using a Bidding Game — Yeng-Horng Perng, Yi-Kai Juan, and Sheng-Fen Chien; 132 (10), 1037-42 (2006).

Electrical systems
Sequence Planning for Electrical Construction — Michael J. Horman, Matthew P. Orosz, and David R. Riley; 132 (4), 363-72 (2006).

Conceptual Planning Process for Electrical Construction — Cindy L. Menches and Awad S. Hanna; 132 (12), 1306-13 (2006).

Elevators
Improving the Safety and Efficiency of Materials Transfer at a Construction Site by Using an Elevator — Pia Perttula, Pekka Korhonen, Jouni Lehtelä, Pirkko-Liisa Rasa, Jari-Pekka Kitinoja, Simo Mäkimattila, and Timo Leskinen; 132 (8), 836-43 (2006).

Emergency services
Rapid Bridge Replacement: Processes, Techniques, and Needs for Improvements — Yong Bai and William R. Burkett; 132 (11), 1139-47 (2006).

Employees
Proposed Subcontractor-Based Employee Motivational Model — Robert F. Cox, Raja R. A. Issa, and Aimee Frey; 132 (2), 152-63 (2006).

What Does the Construction Industry Value in Its Workers? — Issam M. Srour, Carl T. Haas, and John D. Borcherding; 132 (10), 1053-8 (2006).

Linear Programming Approach to Optimize Strategic Investment in the Construction Workforce — Issam M. Srour, Carl T. Haas, and David P. Morton; 132 (11), 1158-66 (2006).

Employment
Job Performance Evaluation for Construction Companies: An Analytic Network Process Approach — Eddie W. L. Cheng and Heng Li; 132 (8), 827-35 (2006).

Engineering education
Comparative Study of University Courses on Critical-Path Method Scheduling — Patricia D. Galloway; 132 (7), 712-22 (2006).

The Limitations of Planning: The Importance of Learning — Michael S. Puddicombe; 132 (9), 949-55 (2006).

Engineering firms
Total Quality Performance of Design/Build Firms Using Quality Function Deployment — Dong-Eun Lee and David Arditi; 132 (1), 49-57 (2006).

Determinants of International Architectural, Engineering, and Construction Firms' Project Success in China — Florence Yean Yng Ling, C. William Ibbs, and Wei Yee Hoo; 132 (2), 206-14 (2006).

Entropy
Entropy Application to Improve Construction Finance Decisions — C. M. Tang, A. Y. T. Leung, and K. C. Lam; 132 (10), 1099-113 (2006).

Environmental issues
Only Dynamics Can Absorb Dynamics — Dory Telem, Alexander Laufer, and Aviad Shapira; 132 (11), 1167-77 (2006).

Estimation
Crew Production Rates for Contract Time Estimation: Beam Erection, Deck, and Rail of Highway Bridges — James T. O'Connor and Youngki Huh; 132 (4), 408-15 (2006).

Predicting Construction Cost Using Multiple Regression Techniques — David J. Lowe, Margaret W. Emsley, and Anthony Harding; 132 (7), 750-8 (2006).

Evaluation
Price and Nonprice Criteria for Contractor Selection — F. Waara and J. Bröchner; 132 (8), 797-804 (2006).

Job Performance Evaluation for Construction Companies: An Analytic Network Process Approach — Eddie W. L. Cheng and Heng Li; 132 (8), 827-35 (2006).

Evaluation Model for Information Systems Benefits in Construction Management Processes — Jung-Ho Yu, Hyun-Soo Lee, and Wooyoung Kim; 132 (10), 1114-21 (2006).

Modeling of Functional Construction Requirements for Constructability Analysis — Yuanbin Song and David K. H. Chua; 132 (12), 1314-26 (2006).

Excavation
Innovative Central Opening Strut System for Foundation Excavation — Min-Lung Yang, Sheng-Jin Chen, and Shun-Tyan Chen; 132 (1), 58-66 (2006).

Bayesian Updating Application into Simulation in the North Edmonton Sanitary Trunk Tunnel Project — Tae Hwan Chung, Yasser Mohamed, and Simaan AbouRizk; 132 (8), 882-94 (2006).

Intelligent Utility Locating Tool for Excavators — Bopanna T. Kolera and Leonhard E. Bernold; 132 (9), 919-27 (2006).

Integration of Construction As-Built Data Via Laser Scanning with Geotechnical Monitoring of Urban Excavation — Y. Y. Su, Y. M. A. Hashash, and L. Y. Liu; 132 (12), 1234-41 (2006).

Facilities
Markov-Based Optimization Model for Building Facilities Management — Xueqing Zhang; 132 (11), 1203-11 (2006).

Multiproject Planning and Resource Controls for Facility Management — E. William East and Liang Y. Liu; 132 (12), 1294-305 (2006).

Facility expansion
Infrastructure Development and Expansion under Uncertainty: A Risk-Preference-Based Lattice Approach — Tong Zhao and Chung C. Fu; 132 (6), 620-5 (2006).

Fast track construction
Reliability and Stability Buffering Approach: Focusing on the Issues of Errors and Changes in Concurrent Design and Construction Projects — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 132 (5), 452-64 (2006).

Fast-Track Urban Freeway Rehabilitation with 55-H Weekend Closures: I-710 Long Beach Case Study — Eul-Bum Lee, Hojung Lee, and John T. Harvey; 132 (5), 465-72 (2006).

Fatalities
Comparative Injury and Fatality Risk Analysis of Building Trades — Selim Baradan and Mumtaz A. Usmen; 132 (5), 533-9 (2006).

Feasibility studies
CAPM-Based Valuation of Financial Government Supports to Infeasible and Risky Private Infrastructure Projects — Andreas Wibowo; 132 (3), 239-48 (2006).

Feedback control
Model for Automated Monitoring of Fall Hazards in Building Construction — R. Navon and O. Kolton; 132 (7), 733-40 (2006).

Financial management
Public Clients' Best Value Perspectives of Public Private Partnerships in Infrastructure Development — Xueqing Zhang; 132 (2), 107-14 (2006).

CAPM-Based Valuation of Financial Government Supports to Infeasible and Risky Private Infrastructure Projects — Andreas Wibowo; 132 (3), 239-48 (2006).

Examining the Business Impact of Owner Commitment to Sustainability — Salwa M. A. Beheiry, Wai Kiong Chong, and Carl T. Haas; 132 (4), 384-92 (2006).

Model for Financial Renegotiation in Public-Private Partnership Projects and Its Policy Implications: Game Theoretic View — S. Ping Ho; 132 (7), 678-88 (2006).

Entropy Application to Improve Construction Finance Decisions — C. M. Tang, A. Y. T. Leung, and K. C. Lam; 132 (10), 1099-113 (2006).

Classifying Construction Contractors Using Unsupervised-Learning Neural Networks — Ashraf M. Elazouni; 132 (12), 1242-53 (2006).

Forecasting
The Gulf of Mexico Decommissioning Market — Mark J. Kaiser and Wumi O. Iledare; 132 (8), 815-26 (2006).

Forecasting Project Status by Using Fuzzy Logic — J. Li, O. Moselhi, and S. Alkass; 132 (11), 1193-202 (2006).

Foreign firms
Strengths, Weaknesses, Opportunities, and Threats for Foreign-Invested Construction Enterprises: A China Study — Li Yin Shen, Zhen Yu Zhao, and Derek S. Drew; 132 (9), 966-75 (2006).

Foundations
Innovative Central Opening Strut System for Foundation Excavation — Min-Lung Yang, Sheng-Jin Chen, and Shun-Tyan Chen; 132 (1), 58-66 (2006).

Framed structures
Empirical Evaluation of Structural Frame Performance Criteria: Realizing the Potential of Hybrid Concrete Construction — R. Soetanto, A. R. J. Dainty, J. Glass, and A. D. F. Price; 132 (3), 278-90 (2006).

Frames
Empirical Evaluation of Structural Frame Performance Criteria: Realizing the Potential of Hybrid Concrete Construction — R. Soetanto, A. R. J. Dainty, J. Glass, and A. D. F. Price; 132 (3), 278-90 (2006).

Fuzzy sets
Entropy Application to Improve Construction Finance Decisions — C. M. Tang, A. Y. T. Leung, and K. C. Lam; 132 (10), 1099-113 (2006).

Forecasting Project Status by Using Fuzzy Logic — J. Li, O. Moselhi, and S. Alkass; 132 (11), 1193-202 (2006).

Geographic information systems
Using GPS to Measure the Impact of Construction Activities on Rural Interstates — Camilo Garcia, Ryan Huebschman, Dulcy M. Abraham, and Darcy M. Bullock; 132 (5), 508-15 (2006).

Global positioning
Using Global Positioning System to Improve Materials-Locating Processes on Industrial

Projects — Carlos H. Caldas, David Grau Torrent, and Carl T. Haas; 132 (7), 741-9 (2006).

Gulf of Mexico

Offshore Decommissioning Cost Estimation in the Gulf of Mexico — Mark J. Kaiser; 132 (3), 249-58 (2006).

The Gulf of Mexico Decommissioning Market — Mark J. Kaiser and Wumi O. Iledare; 132 (8), 815-26 (2006).

Hazards

Safety Hazard Identification on Construction Projects — Gregory Carter and Simon D. Smith; 132 (2), 197-205 (2006).

Model for Automated Monitoring of Fall Hazards in Building Construction — R. Navon and O. Kolton; 132 (7), 733-40 (2006).

Health hazards

Improving the Safety and Efficiency of Materials Transfer at a Construction Site by Using an Elevator — Pia Perttula, Pekka Korhonen, Jouni Lehtelä, Pirkko-Liisa Rasa, Jari-Pekka Kitinoja, Simo Mäkimattila, and Timo Leskinen; 132 (8), 836-43 (2006).

Healthcare facilities

Key Performance Indicators for Strategic Healthcare Facilities Maintenance — Igal M. Shohet; 132 (4), 345-52 (2006).

Highway construction

Measuring Project Level Productivity on Transportation Projects — Ralph D. Ellis and Seunghyun Lee; 132 (3), 314-20 (2006).

Lighting Requirements for Nighttime Highway Construction — Khalied Hyari and Khaled El-Rayes; 132 (5), 435-43 (2006).

Fast-Track Urban Freeway Rehabilitation with 55-H Weekend Closures: I-710 Long Beach Case Study — Eul-Bum Lee, Hojung Lee, and John T. Harvey; 132 (5), 465-72 (2006).

Using GPS to Measure the Impact of Construction Activities on Rural Interstates — Camilo Garcia, Ryan Huebschman, Dulcy M. Abraham, and Darcy M. Bullock; 132 (5), 508-15 (2006).

Hong Kong

Safety Climate in Construction Industry: A Case Study in Hong Kong — Dongping Fang, Yang Chen, and Louisa Wong; 132 (6), 573-84 (2006).

Construction Delays in Hong Kong Civil Engineering Projects — Tommy Y. Lo, Ivan W. H. Fung, and Karen C. F. Tung; 132 (6), 636-49 (2006).

Exploratory Study of Knowledge Sharing in Contracting Companies: A Sociotechnical Perspective — Patrick Sik-wah Fong and Lily Chu; 132 (9), 928-39 (2006).

Imaging techniques

Multimodal Image Retrieval from Construction Databases and Model-Based Systems — Ioannis Brilakis and Lucio Soibelman; 132 (7), 777-85 (2006).

Incentives

Price and Nonprice Criteria for Contractor Selection — F. Waara and J. Bröchner; 132 (8), 797-804 (2006).

India

Critical Factors Affecting Schedule Performance: Evidence from Indian Construction Projects — K. C. Iyer and K. N. Jha; 132 (8), 871-81 (2006).

Information management

Success/Failure Factors and Performance Measures of Web-Based Construction Project Management Systems: Professionals' Viewpoint — Pollaphat Nitithamyong and Mirosław J. Skibniewski; 132 (1), 80-7 (2006).

3D Scan Information Management System for Construction Management — Naai-Jung Shih and Sen-Tien Huang; 132 (2), 134-42 (2006).

Application of Dependency Structure Matrix for Activity Sequencing in Concurrent Engineering Projects — J. Uma Maheswari, Koshy Varghese, and T. Sridharan; 132 (5), 482-90 (2006).

Firm Performance and Information Technology Utilization in the Construction Industry — Mohammad El-Mashaleh, William J. O'Brien, and R. Edward Minchin; 132 (5), 499-507 (2006).

Prototype System for Knowledge Problem Definition — Ahmed M. Al-Ghassani, John M. Kamara, Chimay J. Anumba, and Patricia M. Carrillo; 132 (5), 516-24 (2006).

Multimodal Image Retrieval from Construction Databases and Model-Based Systems — Ioannis Brilakis and Lucio Soibelman; 132 (7), 777-85 (2006).

Construction IT Decision Making Using Multiattribute Utility Theory for Use in a Laboratory Information Management System — Tarek Elmisalami, Russell Walters, and Edward J. Jaselskis; 132 (12), 1275-83 (2006).

Information retrieval

Multimodal Image Retrieval from Construction Databases and Model-Based Systems — Ioannis Brilakis and Lucio Soibelman; 132 (7), 777-85 (2006).

Information systems

Success/Failure Factors and Performance Measures of Web-Based Construction Project Management Systems: Professionals' Viewpoint — Pollaphat Nitithamyong and Mirosław J. Skibniewski; 132 (1), 80-7 (2006).

Evaluation Model for Information Systems Benefits in Construction Management Processes — Jung-Ho Yu, Hyun-Soo Lee, and Wooyoung Kim; 132 (10), 1114-21 (2006).

Information technology (IT)

Success/Failure Factors and Performance Measures of Web-Based Construction Project Management Systems: Professionals' Viewpoint — Pollaphat Nitithamyong and Mirosław J. Skibniewski; 132 (1), 80-7 (2006).

Web-Services Environment for Collaborative Management of Product Life-Cycle Costs — Tamer E. El-Diraby; 132 (3), 300-13 (2006).

Parallel Genetic Algorithms for Optimizing Resource Utilization in Large-Scale Construction Projects — Amr Kandil and Khaled El-Rayes; 132 (5), 491-8 (2006).

Prototype System for Knowledge Problem Definition — Ahmed M. Al-Ghassani, John M. Kamara, Chimay J. Anumba, and Patricia M. Carrillo; 132 (5), 516-24 (2006).

Paving the Way to the Vision of Digital Construction: A Strategic Roadmap — Yacine Rezgui and Alain Zarli; 132 (7), 767-76 (2006).

Multimodal Image Retrieval from Construction Databases and Model-Based Systems — Ioannis Brilakis and Lucio Soibelman; 132 (7), 777-85 (2006).

Systems Analysis of Technical Advancement in Earthmoving Equipment — C. B. Tatum, Michael Vorster, Mac G. Klingler, and Boyd C. Paulson; 132 (9), 976-86 (2006).

Experimental Assessment of Wireless Construction Technologies — Suchart Nuntasunti and Leonhard E. Bernold; 132 (9), 1009-18 (2006).

Modeling and Analyzing the Impact of Technology on Data Capture and Transfer Processes at Construction Sites: A Case Study — Burcu Akinci, Semiha Kiziltas, Esin Ergen, Itir Z. Karaesmen, and Fuat Keceli; 132 (11), 1148-57 (2006).

Construction IT Decision Making Using Multiattribute Utility Theory for Use in a Laboratory Information Management System — Tarek Elmisalami, Russell Walters, and Edward J. Jaselskis; 132 (12), 1275-83 (2006).

Infrastructure

Computerized System for Efficient Delivery of Infrastructure Maintenance/Repair Programs — Tarek Hegazy; 132 (1), 26-34 (2006).

Public Clients' Best Value Perspectives of Public Private Partnerships in Infrastructure Development — Xueqing Zhang; 132 (2), 107-14 (2006).

CAPM-Based Valuation of Financial Government Supports to Infeasible and Risky Private Infrastructure Projects — Andreas Wibowo; 132 (3), 239-48 (2006).

Infrastructure Development and Expansion under Uncertainty: A Risk-Preference-Based Lattice Approach — Tong Zhao and Chung C. Fu; 132 (6), 620-5 (2006).

Modeling Cost Escalation in Large Infrastructure Projects — Ali Touran and Ramon Lopez; 132 (8), 853-60 (2006).

Factor Analysis of Public Clients' Best-Value Objective in Public–Privately Partnered Infrastructure Projects — Xueqing Zhang; 132 (9), 956-65 (2006).

Injuries

Analysis of Construction Worker Injuries That Do Not Result in Lost Time — Jimmie Hinze, Jenny N. Devenport, and Geneva Giang; 132 (3), 321-6 (2006).

Comparative Injury and Fatality Risk Analysis of Building Trades — Selim Baradan and Mumtaz A. Usmen; 132 (5), 533-9 (2006).

Physical Risk Factors and Controls for Musculoskeletal Disorders in Construction Trades — Peregrin Spielholz, Gary Davis, and Jason Griffith; 132 (10), 1059-68 (2006).

Innovation

Systems Analysis of Technical Advancement in Earthmoving Equipment — C. B. Tatum, Michael Vorster, Mac G. Klingler, and Boyd C. Paulson; 132 (9), 976-86 (2006).

Innovations in Earthmoving Equipment: New Forms and Their Evolution — C. B. Tatum, Michael Vorster, and Mac Klingler; 132 (9), 987-97 (2006).

Stimulating Construction Innovation in Singapore through the National System of Innovation — Lim Jay Na, George Ofori, and Moonseo Park; 132 (10), 1069-82 (2006).

Insulation
Structural Insulated Panels: Impact on the Residential Construction Process — Michael A. Mullens and Mohammed Arif; 132 (7), 786-94 (2006).

Interfaces
Identifying a Design Management Package to Support Concurrent Design in Building Wafer Fabrication Facilities — Ren-Jye Dzeng; 132 (6), 606-14 (2006).

International factors
Determinants of International Architectural, Engineering, and Construction Firms' Project Success in China — Florence Yean Yng Ling, C. William Ibbs, and Wei Yee Hoo; 132 (2), 206-14 (2006).

MAUT-Based Dispute Resolution Selection Model Prototype for International Construction Projects — Edwin H. W. Chan, Henry C. H. Suen, and Charles K. L. Chan; 132 (5), 444-51 (2006).

Case-Based Reasoning Model for International Market Selection — Beliz Ozorhon, Irem Dikmen, and M. Talat Birgonul; 132 (9), 940-8 (2006).

Internet
Use of a WBS Matrix to Improve Interface Management in Projects — David K. H. Chua and Myriam Godinot; 132 (1), 67-79 (2006).

Success/Failure Factors and Performance Measures of Web-Based Construction Project Management Systems: Professionals' Viewpoint — Pollaphat Nitithamyong and Mirosław J. Skibniewski; 132 (1), 80-7 (2006).

Construction Business Automation System — Dong-Eun Lee and Jonathan J. Shi; 132 (1), 88-96 (2006).

Moving a Reinforced-Concrete Building: Case Study — Dory Telem, Aviad Shapira, Ytzhak D. Goren, and Cliff J. Schexnayder; 132 (2), 115-24 (2006).

Web-Services Environment for Collaborative Management of Product Life-Cycle Costs — Tamer E. El-Diraby; 132 (3), 300-13 (2006).

Experimental Assessment of Wireless Construction Technologies — Suchart Nuntasunti and Leonhard E. Bernold; 132 (9), 1009-18 (2006).

Interstate highways
Using GPS to Measure the Impact of Construction Activities on Rural Interstates — Camilo Garcia, Ryan Huebschman, Dulcy M. Abraham, and Darcy M. Bullock; 132 (5), 508-15 (2006).

Investments
CAPM-Based Valuation of Financial Government Supports to Infeasible and Risky Private Infrastructure Projects — Andreas Wibowo; 132 (3), 239-48 (2006).

Knowledge-based systems
Safety Hazard Identification on Construction Projects — Gregory Carter and Simon D. Smith; 132 (2), 197-205 (2006).

Web-Services Environment for Collaborative Management of Product Life-Cycle Costs — Tamer E. El-Diraby; 132 (3), 300-13 (2006).

Prototype System for Knowledge Problem Definition — Ahmed M. Al-Ghassani, John M. Kamara, Chimay J. Anumba, and Patricia M. Carrillo; 132 (5), 516-24 (2006).

Case-Based Reasoning Model for International Market Selection — Beliz Ozorhon, Irem Dikmen, and M. Talat Birgonul; 132 (9), 940-8 (2006).

The Limitations of Planning: The Importance of Learning — Michael S. Puddicombe; 132 (9), 949-55 (2006).

Labor
Effects of Schedule Pressure on Construction Performance — Madhav Prasad Nepal, Moonseo Park, and Bosik Son; 132 (2), 182-8 (2006).

Laboratory tests
Intelligent Utility Locating Tool for Excavators — Bopanna T. Kolera and Leonhard E. Bernold; 132 (9), 919-27 (2006).

Lattices
Infrastructure Development and Expansion under Uncertainty: A Risk-Preference-Based Lattice Approach — Tong Zhao and Chung C. Fu; 132 (6), 620-5 (2006).

Learning
Price and Nonprice Criteria for Contractor Selection — F. Waara and J. Bröchner; 132 (8), 797-804 (2006).

Life cycle cost
Web-Services Environment for Collaborative Management of Product Life-Cycle Costs — Tamer E. El-Diraby; 132 (3), 300-13 (2006).

Light, artificial
Lighting Requirements for Nighttime Highway Construction — Khalied Hyari and Khaled El-Rayes; 132 (5), 435-43 (2006).

Logistics
Improving the Safety and Efficiency of Materials Transfer at a Construction Site by Using an Elevator — Pia Perttula, Pekka Korhonen, Jouni Lehtelä, Pirkko-Liisa Rasa, Jari-Pekka Kitinoja, Simo Mäkimattila, and Timo Leskinen; 132 (8), 836-43 (2006).

Logistic Likelihood Analysis of Mediation Outcomes — Tak Wing Yiu, Sai On Cheung, and Fung Man Mok; 132 (10), 1026-36 (2006).

Maintenance
Application of Lean Concepts and Simulation Analysis to Improve Efficiency of Drainage Operations Maintenance Crews — Albert Agbulos, Yasser Mohamed, Mohamed Al-Hussein, Simaan AbouRizk, and John Roesch; 132 (3), 291-9 (2006).

Key Performance Indicators for Strategic Healthcare Facilities Maintenance — Igal M. Shohet; 132 (4), 345-52 (2006).

Malaysia
Delay Mitigation in the Malaysian Construction Industry — H. Abdul-Rahman, M. A. Berawi, A. R. Berawi, O. Mohamed, M. Othman, and I. A. Yahya; 132 (2), 125-33 (2006).

Managers
Sequence Planning for Electrical Construction — Michael J. Horman, Matthew P. Orosz, and David R. Riley; 132 (4), 363-72 (2006).

Mapping
Application Framework for Mapping and Simulation of Waste Handling Processes in Construction — Ming Lu, Chi-Sun Poon, and Lap-Chi Wong; 132 (11), 1212-21 (2006).

Markov process
Markov-Based Optimization Model for Building Facilities Management — Xueqing Zhang; 132 (11), 1203-11 (2006).

Measurement
Quantitative Measurement of Successful Performance from the Project Manager's Perspective — Cindy L. Menches and Awad S. Hanna; 132 (12), 1284-93 (2006).

Mediation
Logistic Likelihood Analysis of Mediation Outcomes — Tak Wing Yiu, Sai On Cheung, and Fung Man Mok; 132 (10), 1026-36 (2006).

Microtunneling
Soil Penetration Modeling in Microtunneling Projects — Mohamed Hegab, Gary R. Smith, and Ossama M. Salem; 132 (6), 598-605 (2006).

Models
Modeling and Analyzing the Impact of Technology on Data Capture and Transfer Processes at Construction Sites: A Case Study — Burcu Akinci, Semiha Kiziltas, Esin Ergen, Itir Z. Karaesmen, and Fuat Keceli; 132 (11), 1148-57 (2006).

Decision Tree Modeling Using Integrated Multilevel Stochastic Networks — Mohamed Moussa, Janaka Ruwanpura, and George Jergeas; 132 (12), 1254-66 (2006).

Modeling of Functional Construction Requirements for Constructability Analysis — Yuanbin Song and David K. H. Chua; 132 (12), 1314-26 (2006).

Monitoring
Fast-Track Urban Freeway Rehabilitation with 55-H Weekend Closures: I-710 Long Beach Case Study — Eul-Bum Lee, Hojung Lee, and John T. Harvey; 132 (5), 465-72 (2006).

Model for Automated Monitoring of Fall Hazards in Building Construction — R. Navon and O. Kolton; 132 (7), 733-40 (2006).

Motivation
Proposed Subcontractor-Based Employee Motivational Model — Robert F. Cox, Raja R. A. Issa, and Aimee Frey; 132 (2), 152-63 (2006).

Motivational Climate of Construction Apprentice — Benjamin Obinero Uwakweh; 132 (5), 525-32 (2006).

Multiple objective analysis
Construction IT Decision Making Using Multiattribute Utility Theory for Use in a Laboratory Information Management System — Tarek Elmisalami, Russell Walters, and Edward J. Jaselskis; 132 (12), 1275-83 (2006).

Negotiations
A Study of Styles and Outcomes in Construction Dispute Negotiation — Sai On Cheung, Tak Wing Yiu Yiu, and Sau Fung Yeung; 132 (8), 805-14 (2006).

Networks
Decision Tree Modeling Using Integrated Multilevel Stochastic Networks — Mohamed Moussa, Janaka Ruwanpura, and George Jergeas; 132 (12), 1254-66 (2006).

Neural network
Neural Networks for Estimating the Productivity of Concreting Activities — A. Samer Ezeldin and Lokman M. Sharara; 132 (6), 650-6 (2006).

Neural networks
Classifying Construction Contractors Using Unsupervised-Learning Neural Networks — Ashraf M. Elazouni; 132 (12), 1242-53 (2006).

New York
Rapid Bridge Replacement: Processes, Techniques, and Needs for Improvements — Yong Bai and William R. Burkett; 132 (11), 1139-47 (2006).

Nigeria
Construction Delays and Their Causative Factors in Nigeria — Ajibade Ayodeji Aibinu and Henry Agboola Odeyinka; 132 (7), 667-77 (2006).

Nighttime construction
Lighting Requirements for Nighttime Highway Construction — Khalied Hyari and Khaled El-Rayes; 132 (5), 435-43 (2006).

Occupational safety
Owner's Role in Construction Safety — Xinyu Huang and Jimmie Hinze; 132 (2), 164-73 (2006).

Owner's Role in Construction Safety: Guidance Model — Xinyu Huang and Jimmie Hinze; 132 (2), 174-81 (2006).

Safety Hazard Identification on Construction Projects — Gregory Carter and Simon D. Smith; 132 (2), 197-205 (2006).

Analysis of Construction Worker Injuries That Do Not Result in Lost Time — Jimmie Hinze, Jenny N. Devenport, and Geneva Giang; 132 (3), 321-6 (2006).

Comparative Injury and Fatality Risk Analysis of Building Trades — Selim Baradan and Mumtaz A. Usmen; 132 (5), 533-9 (2006).

Scheduling-Based Risk Estimation and Safety Planning for Construction Projects — Kyoo-Jin Yi and David Langford; 132 (6), 626-35 (2006).

Physical Risk Factors and Controls for Musculoskeletal Disorders in Construction Trades — Peregrin Spielholz, Gary Davis, and Jason Griffith; 132 (10), 1059-68 (2006).

Offshore structures
Offshore Decommissioning Cost Estimation in the Gulf of Mexico — Mark J. Kaiser; 132 (3), 249-58 (2006).

The Gulf of Mexico Decommissioning Market — Mark J. Kaiser and Wumi O. Iledare; 132 (8), 815-26 (2006).

Oklahoma
Lessons Learned from an Emergency Bridge Replacement Project — Yong Bai, William R. Burkett, and Phillip T. Nash; 132 (4), 338-44 (2006).

Rapid Bridge Replacement: Processes, Techniques, and Needs for Improvements — Yong Bai and William R. Burkett; 132 (11), 1139-47 (2006).

Optimization
Computerized System for Efficient Delivery of Infrastructure Maintenance/Repair Programs — Tarek Hegazy; 132 (1), 26-34 (2006).

Particle Swarm Optimization for Preemptive Scheduling under Break and Resource-Constraints — Hong Zhang, Heng Li, and C. M. Tam; 132 (3), 259-67 (2006).

Minimizing Construction-Related Hazards in Airport Expansion Projects — Ahmed Khalafallah and Khaled El-Rayes; 132 (6), 562-72 (2006).

Infrastructure Development and Expansion under Uncertainty: A Risk-Preference-Based Lattice Approach — Tong Zhao and Chung C. Fu; 132 (6), 620-5 (2006).

Linear Programming Approach to Optimize Strategic Investment in the Construction Workforce — Issam M. Srour, Carl T. Haas, and David P. Morton; 132 (11), 1158-66 (2006).

Markov-Based Optimization Model for Building Facilities Management — Xueqing Zhang; 132 (11), 1203-11 (2006).

Particle Swarm Optimization-Supported Simulation for Construction Operations — Hong Zhang, C. M. Tam, Heng Li, and Jonathan Jingsheng Shi; 132 (12), 1267-74 (2006).

Optimization models
Developing a Resource Supply Chain Planning System for Construction Projects — H. Ping Tserng, Samuel Y. L. Yin, and Sherman Li; 132 (4), 393-407 (2006).

Determining Attribute Weights in a CBR Model for Early Cost Prediction of Structural Systems — Sevgi Zeynep Doğan, David Arditi, and H. Murat Günaydın; 132 (10), 1092-8 (2006).

Organizations
The Limitations of Planning: The Importance of Learning — Michael S. Puddicombe; 132 (9), 949-55 (2006).

Owners
Owner's Role in Construction Safety — Xinyu Huang and Jimmie Hinze; 132 (2), 164-73 (2006).

Owner's Role in Construction Safety: Guidance Model — Xinyu Huang and Jimmie Hinze; 132 (2), 174-81 (2006).

Examining the Business Impact of Owner Commitment to Sustainability — Salwa M. A. Beheiry, Wai Kiong Chong, and Carl T. Haas; 132 (4), 384-92 (2006).

Panels
Structural Insulated Panels: Impact on the Residential Construction Process — Michael A. Mullens and Mohammed Arif; 132 (7), 786-94 (2006).

Particles
Particle Swarm Optimization-Supported Simulation for Construction Operations — Hong Zhang, C. M. Tam, Heng Li, and Jonathan Jingsheng Shi; 132 (12), 1267-74 (2006).

Partnerships
Public Clients' Best Value Perspectives of Public Private Partnerships in Infrastructure Development — Xueqing Zhang; 132 (2), 107-14 (2006).

Factor Analysis of Public Clients' Best-Value Objective in Public–Privately Partnered Infrastructure Projects — Xueqing Zhang; 132 (9), 956-65 (2006).

Partnering Mechanism in Construction: An Empirical Study on the Chinese Construction Industry — Wenzhe Tang, Colin F. Duffield, and David M. Young; 132 (3), 217-29 (2006).

Model for Financial Renegotiation in Public-Private Partnership Projects and Its Policy Implications: Game Theoretic View — S. Ping Ho; 132 (7), 678-88 (2006).

Penetration
Soil Penetration Modeling in Microtunneling Projects — Mohamed Hegab, Gary R. Smith, and Ossama M. Salem; 132 (6), 598-605 (2006).

Pennsylvania
Rapid Bridge Replacement: Processes, Techniques, and Needs for Improvements — Yong Bai and William R. Burkett; 132 (11), 1139-47 (2006).

Performance characteristics
Empirical Evaluation of Structural Frame Performance Criteria: Realizing the Potential of Hybrid Concrete Construction — R. Soetanto, A. R. J. Dainty, J. Glass, and A. D. F. Price; 132 (3), 278-90 (2006).

Construction Delays in Hong Kong Civil Engineering Projects — Tommy Y. Ło, Ivan W. H. Fung, and Karen C. F. Tung; 132 (6), 636-49 (2006).

Quantitative Measurement of Successful Performance from the Project Manager's Perspective — Cindy L. Menches and Awad S. Hanna; 132 (12), 1284-93 (2006).

Conceptual Planning Process for Electrical Construction — Cindy L. Menches and Awad S. Hanna; 132 (12), 1306-13 (2006).

Performance evaluation
Firm Performance and Information Technology Utilization in the Construction Industry — Mohammad El-Mashaleh, William J. O'Brien, and R. Edward Minchin; 132 (5), 499-507 (2006).

Personnel management
Fundamental Principles of Workforce Management — H. Randolph Thomas and Michael J. Horman; 132 (1), 97-104 (2006).

Proposed Subcontractor-Based Employee Motivational Model — Robert F. Cox, Raja R. A. Issa, and Aimee Frey; 132 (2), 152-63 (2006).

Motivational Climate of Construction Apprentice — Benjamin Obinero Uwakweh; 132 (5), 525-32 (2006).

Job Performance Evaluation for Construction Companies: An Analytic Network Process Approach — Eddie W. L. Cheng and Heng Li; 132 (8), 827-35 (2006).

Planning
Sequence Planning for Electrical Construction — Michael J. Horman, Matthew P. Orosz, and David R. Riley; 132 (4), 363-72 (2006).

Quantitative Measurement of Successful Performance from the Project Manager's Perspective — Cindy L. Menches and Awad S. Hanna; 132 (12), 1284-93 (2006).

Conceptual Planning Process for Electrical Construction — Cindy L. Menches and Awad S. Hanna; 132 (12), 1306-13 (2006).

Platforms
Offshore Decommissioning Cost Estimation in the Gulf of Mexico — Mark J. Kaiser; 132 (3), 249-58 (2006).

The Gulf of Mexico Decommissioning Market — Mark J. Kaiser and Wumi O. Iledare; 132 (8), 815-26 (2006).

Predictions
Predicting Construction Cost Using Multiple Regression Techniques — David J. Lowe, Margaret W. Emsley, and Anthony Harding; 132 (7), 750-8 (2006).

Determining Attribute Weights in a CBR Model for Early Cost Prediction of Structural Systems — Sevgi Zeynep Doğan, David Arditi, and H. Murat Günaydın; 132 (10), 1092-8 (2006).

Pricing
Testing Vickery's Revenue Equivalence Theory in Construction Auctions — Derek S. Drew and Martin Skitmore; 132 (4), 425-8 (2006).

Procurement Routes in Public Building and Construction Projects — Ola Lædre, Kjell Austeng, Tore I. Haugen, and Ole Jonny Klakegg; 132 (7), 689-96 (2006).

Price and Nonprice Criteria for Contractor Selection — F. Waara and J. Bröchner; 132 (8), 797-804 (2006).

Private sector
Public Clients' Best Value Perspectives of Public Private Partnerships in Infrastructure Development — Xueqing Zhang; 132 (2), 107-14 (2006).

Factor Analysis of Public Clients' Best-Value Objective in Public–Privately Partnered Infrastructure Projects — Xueqing Zhang; 132 (9), 956-65 (2006).

Privatization
CAPM-Based Valuation of Financial Government Supports to Infeasible and Risky Private Infrastructure Projects — Andreas Wibowo; 132 (3), 239-48 (2006).

Factor Analysis of Public Clients' Best-Value Objective in Public–Privately Partnered Infrastructure Projects — Xueqing Zhang; 132 (9), 956-65 (2006).

Probabilistic models
Modeling Cost Escalation in Large Infrastructure Projects — Ali Touran and Ramon Lopez; 132 (8), 853-60 (2006).

Probability
Automated Statistical Analysis in Stochastic Project Scheduling Simulation — Dong-Eun Lee and David Arditi; 132 (3), 268-77 (2006).

Process control
Contractor Process Improvement for Enhancing Construction Productivity — David S. Cottrell; 132 (2), 189-96 (2006).

Procurement
Public Clients' Best Value Perspectives of Public Private Partnerships in Infrastructure Development — Xueqing Zhang; 132 (2), 107-14 (2006).

Comparing Procurement Methods for Design-Build Projects — Marwa A. El Wardani, John I. Messner, and Michael J. Horman; 132 (3), 230-8 (2006).

Model for Financial Renegotiation in Public-Private Partnership Projects and Its Policy Implications: Game Theoretic View — S. Ping Ho; 132 (7), 678-88 (2006).

Productivity
Fundamental Principles of Workforce Management — H. Randolph Thomas and Michael J. Horman; 132 (1), 97-104 (2006).

Effects of Schedule Pressure on Construction Performance — Madhav Prasad Nepal, Moonseo Park, and Bosik Son; 132 (2), 182-8 (2006).

Contractor Process Improvement for Enhancing Construction Productivity — David S. Cottrell; 132 (2), 189-96 (2006).

Application of Lean Concepts and Simulation Analysis to Improve Efficiency of Drainage Operations Maintenance Crews — Albert Agbulos, Yasser Mohamed, Mohamed Al-Hussein, Simaan AbouRizk, and John Roesch; 132 (3), 291-9 (2006).

Measuring Project Level Productivity on Transportation Projects — Ralph D. Ellis and Seunghyun Lee; 132 (3), 314-20 (2006).

Analysis of Construction Worker Injuries That Do Not Result in Lost Time — Jimmie Hinze, Jenny N. Devenport, and Geneva Giang; 132 (3), 321-6 (2006).

Crew Production Rates for Contract Time Estimation: Beam Erection, Deck, and Rail of Highway Bridges — James T. O'Connor and Youngki Huh; 132 (4), 408-15 (2006).

Fast-Track Urban Freeway Rehabilitation with 55-H Weekend Closures: I-710 Long Beach Case Study — Eul-Bum Lee, Hojung Lee, and John T. Harvey; 132 (5), 465-72 (2006).

Soil Penetration Modeling in Microtunneling Projects — Mohamed Hegab, Gary R. Smith, and Ossama M. Salem; 132 (6), 598-605 (2006).

Construction Delays in Hong Kong Civil Engineering Projects — Tommy Y. Lo, Ivan W. H. Fung, and Karen C. F. Tung; 132 (6), 636-49 (2006).

Neural Networks for Estimating the Productivity of Concreting Activities — A. Samer Ezeldin and Lokman M. Sharara; 132 (6), 650-6 (2006).

Structural Insulated Panels: Impact on the Residential Construction Process — Michael A. Mullens and Mohammed Arif; 132 (7), 786-94 (2006).

Professional development
Survey of the Construction Industry Relative to the Use of CPM Scheduling for Construction Projects — Patricia D. Galloway; 132 (7), 697-711 (2006).

Project management
Relative Effectiveness of Project Delivery and Contract Strategies — Adetokunbo A. Oyetunji and Stuart D. Anderson; 132 (1), 3-13 (2006).

Work Continuity Constraints in Project Scheduling — Mario Vanhoucke; 132 (1), 14-25 (2006).

Use of a WBS Matrix to Improve Interface Management in Projects — David K. H. Chua and Myriam Godinot; 132 (1), 67-79 (2006).

Web-Services Environment for Collaborative Management of Product Life-Cycle Costs — Tamer E. El-Diraby; 132 (3), 300-13 (2006).

Measuring Project Level Productivity on Transportation Projects — Ralph D. Ellis and Seunghyun Lee; 132 (3), 314-20 (2006).

Constructability State of Practice Report — James B. Pocock, Steven T. Kuennen, John Gambatese, and Jon Rauschkolb; 132 (4), 373-83 (2006).

Examining the Business Impact of Owner Commitment to Sustainability — Salwa M. A. Beheiry, Wai Kiong Chong, and Carl T. Haas; 132 (4), 384-92 (2006).

Application of Dependency Structure Matrix for Activity Sequencing in Concurrent Engineering Projects — J. Uma Maheswari, Koshy Varghese, and T. Sridharan; 132 (5), 482-90 (2006).

Developing a Complexity Measure for Project Schedules — Khaled M. Nassar and Mohamed Y. Hegab; 132 (6), 554-61 (2006).

Non-Unit-Based Planning and Scheduling of Repetitive Construction Projects — Rong-yau Huang and Kuo-Shun Sun; 132 (6), 585-97 (2006).

Management and Construction of the Three Gorges Project — Huichao Dai, Guangjing Cao, and Huaizhi Su; 132 (6), 615-9 (2006).

Construction Delays in Hong Kong Civil Engineering Projects — Tommy Y. Lo, Ivan W. H. Fung, and Karen C. F. Tung; 132 (6), 636-49 (2006).

Neural Networks for Estimating the Productivity of Concreting Activities — A. Samer Ezeldin and Lokman M. Sharara; 132 (6), 650-6 (2006).

Construction Delays and Their Causative Factors in Nigeria — Ajibade Ayodeji Aibinu and Henry Agboola Odeyinka; 132 (7), 667-77 (2006).

Survey of the Construction Industry Relative to the Use of CPM Scheduling for Construction Projects — Patricia D. Galloway; 132 (7), 697-711 (2006).

Economic Value of Building Faster — Kenneth Reinschmidt and David Trejo; 132 (7), 759-66 (2006).

Downside Risks in Construction Projects Developed by the Civil Service: The Case of Spain — M. Pilar de la Cruz, Alfredo del Caño, and Elisa de la Cruz; 132 (8), 844-52 (2006).

Scheduling Construction Projects Using Evolutionary Algorithm — Piotr Jaśkowski and Anna Sobotka; 132 (8), 861-70 (2006).

Critical Factors Affecting Schedule Performance: Evidence from Indian Construction Projects — K. C. Iyer and K. N. Jha; 132 (8), 871-81 (2006).

The Limitations of Planning: The Importance of Learning — Michael S. Puddicombe; 132 (9), 949-55 (2006).

Only Dynamics Can Absorb Dynamics — Dory Telem, Alexander Laufer, and Aviad Shapira; 132 (11), 1167-77 (2006).

Forecasting Project Status by Using Fuzzy Logic — J. Li, O. Moselhi, and S. Alkass; 132 (11), 1193-202 (2006).

Quantitative Measurement of Successful Performance from the Project Manager's Perspective — Cindy L. Menches and Awad S. Hanna; 132 (12), 1284-93 (2006).

Multiproject Planning and Resource Controls for Facility Management — E. William East and Liang Y. Liu; 132 (12), 1294-305 (2006).

Public works
Downside Risks in Construction Projects Developed by the Civil Service: The Case of Spain — M. Pilar de la Cruz, Alfredo del Caño, and Elisa de la Cruz; 132 (8), 844-52 (2006).

Quality control
Total Quality Performance of Design/Build Firms Using Quality Function Deployment — Dong-Eun Lee and David Arditi; 132 (1), 49-57 (2006).

Effects of Schedule Pressure on Construction Performance — Madhav Prasad Nepal, Moonseo Park, and Bosik Son; 132 (2), 182-8 (2006).

Contractor Process Improvement for Enhancing Construction Productivity — David S. Cottrell; 132 (2), 189-96 (2006).

Partnering Mechanism in Construction: An Empirical Study on the Chinese Construction Industry — Wenzhe Tang, Colin F. Duffield, and David M. Young; 132 (3), 217-29 (2006).

Quantitative analysis
Crew Production Rates for Contract Time Estimation: Beam Erection, Deck, and Rail of Highway Bridges — James T. O'Connor and Youngki Huh; 132 (4), 408-15 (2006).

Reconstruction
Fast-Track Urban Freeway Rehabilitation with 55-H Weekend Closures: I-710 Long Beach Case Study — Eul-Bum Lee, Hojung Lee, and John T. Harvey; 132 (5), 465-72 (2006).

Regression analysis
Statistical Considerations for Predicting Residual Value of Heavy Equipment — Gunnar Lucko, Christine M. Anderson-Cook, and Michael C. Vorster; 132 (7), 723-32 (2006).

Predicting Construction Cost Using Multiple Regression Techniques — David J. Lowe, Margaret W. Emsley, and Anthony Harding; 132 (7), 750-8 (2006).

What Does the Construction Industry Value in Its Workers? — Issam M. Srour, Carl T. Haas, and John D. Borcherding; 132 (10), 1053-8 (2006).

Rehabilitation
Fast-Track Urban Freeway Rehabilitation with 55-H Weekend Closures: I-710 Long Beach Case Study — Eul-Bum Lee, Hojung Lee, and John T. Harvey; 132 (5), 465-72 (2006).

Rapid Bridge Replacement: Processes, Techniques, and Needs for Improvements — Yong Bai and William R. Burkett; 132 (11), 1139-47 (2006).

Relocation
Moving a Reinforced-Concrete Building: Case Study — Dory Telem, Aviad Shapira, Yizhak D. Goren, and Cliff J. Schexnayder; 132 (2), 115-24 (2006).

Replacement
Lessons Learned from an Emergency Bridge Replacement Project — Yong Bai, William R. Burkett, and Phillip T. Nash; 132 (4), 338-44 (2006).

Research
Measuring Project Level Productivity on Transportation Projects — Ralph D. Ellis and Seunghyun Lee; 132 (3), 314-20 (2006).

Resource management
Developing a Resource Supply Chain Planning System for Construction Projects — H. Ping Tserng, Samuel Y. L. Yin, and Sherman Li; 132 (4), 393-407 (2006).

Non-Unit-Based Planning and Scheduling of Repetitive Construction Projects — Rong-yau Huang and Kuo-Shun Sun; 132 (6), 585-97 (2006).

Using Global Positioning System to Improve Materials-Locating Processes on Industrial Projects — Carlos H. Caldas, David Grau Torrent, and Carl T. Haas; 132 (7), 741-9 (2006).

Multiproject Planning and Resource Controls for Facility Management — E. William East and Liang Y. Liu; 132 (12), 1294-305 (2006).

Risk management
Safety Hazard Identification on Construction Projects — Gregory Carter and Simon D. Smith; 132 (2), 197-205 (2006).

Partnering Mechanism in Construction: An Empirical Study on the Chinese Construction Industry — Wenzhe Tang, Colin F. Duffield, and David M. Young; 132 (3), 217-29 (2006).

Comparative Injury and Fatality Risk Analysis of Building Trades — Selim Baradan and Mumtaz A. Usmen; 132 (5), 533-9 (2006).

Scheduling-Based Risk Estimation and Safety Planning for Construction Projects — Kyoo-Jin Yi and David Langford; 132 (6), 626-35 (2006).

Structural Insulated Panels: Impact on the Residential Construction Process — Michael A. Mullens and Mohammed Arif; 132 (7), 786-94 (2006).

Downside Risks in Construction Projects Developed by the Civil Service: The Case of Spain — M. Pilar de la Cruz, Alfredo del Caño, and Elisa de la Cruz; 132 (8), 844-52 (2006).

Modeling Cost Escalation in Large Infrastructure Projects — Ali Touran and Ramon Lopez; 132 (8), 853-60 (2006).

Risks
Infrastructure Development and Expansion under Uncertainty: A Risk-Preference-Based Lattice Approach — Tong Zhao and Chung C. Fu; 132 (6), 620-5 (2006).

Rural areas
Using GPS to Measure the Impact of Construction Activities on Rural Interstates — Camilo Garcia, Ryan Huebschman, Dulcy M. Abraham, and Darcy M. Bullock; 132 (5), 508-15 (2006).

Safety
Lighting Requirements for Nighttime Highway Construction — Khalied Hyari and Khaled El-Rayes; 132 (5), 435-43 (2006).

Minimizing Construction-Related Hazards in Airport Expansion Projects — Ahmed Khalafallah and Khaled El-Rayes; 132 (6), 562-72 (2006).

Safety Climate in Construction Industry: A Case Study in Hong Kong — Dongping Fang, Yang Chen, and Louisa Wong; 132 (6), 573-84 (2006).

Scheduling-Based Risk Estimation and Safety Planning for Construction Projects — Kyoo-Jin Yi and David Langford; 132 (6), 626-35 (2006).

Improving the Safety and Efficiency of Materials Transfer at a Construction Site by Using an Elevator — Pia Perttula, Pekka Korhonen, Jouni Lehtelä, Pirkko-Liisa Rasa, Jari-Pekka Kitinoja, Simo Mäkimattila, and Timo Leskinen; 132 (8), 836-43 (2006).

Crane-Related Fatalities in the Construction Industry — J. E. Beavers, J. R. Moore, R. Rinehart, and W. R. Schriver; 132 (9), 901-10 (2006).

Intelligent Utility Locating Tool for Excavators — Bopanna T. Kolera and Leonhard E. Bernold; 132 (9), 919-27 (2006).

Experimental Assessment of Wireless Construction Technologies — Suchart Nuntasunti and Leonhard E. Bernold; 132 (9), 1009-18 (2006).

Safety programs
Owner's Role in Construction Safety — Xinyu Huang and Jimmie Hinze; 132 (2), 164-73 (2006).

Physical Risk Factors and Controls for Musculoskeletal Disorders in Construction Trades — Peregrin Spielholz, Gary Davis, and Jason Griffith; 132 (10), 1059-68 (2006).

Salaries
What Does the Construction Industry Value in Its Workers? — Issam M. Srour, Carl T. Haas, and John D. Borcherding; 132 (10), 1053-8 (2006).

Scheduling
Computerized System for Efficient Delivery of Infrastructure Maintenance/Repair Programs — Tarek Hegazy; 132 (1), 26-34 (2006).

Object-Oriented Scheduling for Repetitive Projects with Soft Logics — Su-Ling Fan and H. P. Tserng; 132 (1), 35-48 (2006).

3D Scan Information Management System for Construction Management — Naai-Jung Shih and Sen-Tien Huang; 132 (2), 134-42 (2006).

Effects of Schedule Pressure on Construction Performance — Madhav Prasad Nepal, Moonseo Park, and Bosik Son; 132 (2), 182-8 (2006).

Particle Swarm Optimization for Preemptive Scheduling under Break and Resource-Constraints — Hong Zhang, Heng Li, and C. M. Tam; 132 (3), 259-67 (2006).

Automated Statistical Analysis in Stochastic Project Scheduling Simulation — Dong-Eun Lee and David Arditi; 132 (3), 268-77 (2006).

Examining the Business Impact of Owner Commitment to Sustainability — Salwa M. A. Beheiry, Wai Kiong Chong, and Carl T. Haas; 132 (4), 384-92 (2006).

Reliability and Stability Buffering Approach: Focusing on the Issues of Errors and Changes in Concurrent Design and Construction Projects — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 132 (5), 452-64 (2006).

Critical Space Analysis — Graham M. Winch and Steve North; 132 (5), 473-81 (2006).

Developing a Complexity Measure for Project Schedules — Khaled M. Nassar and Mohamed Y. Hegab; 132 (6), 554-61 (2006).

Non-Unit-Based Planning and Scheduling of Repetitive Construction Projects — Rong-yau Huang and Kuo-Shun Sun; 132 (6), 585-97 (2006).

Scheduling-Based Risk Estimation and Safety Planning for Construction Projects — Kyoo-Jin Yi and David Langford; 132 (6), 626-35 (2006).

Survey of the Construction Industry Relative to the Use of CPM Scheduiing for Construction Projects — Patricia D. Galloway; 132 (7), 697-711 (2006).

Comparative Study of University Courses on Critical-Path Method Scheduling — Patricia D. Galloway; 132 (7), 712-22 (2006).

Modeling Cost Escalation in Large Infrastructure Projects — Ali Touran and Ramon Lopez; 132 (8), 853-60 (2006).

Scheduling Construction Projects Using Evolutionary Algorithm — Piotr Jaśkowski and Anna Sobotka; 132 (8), 861-70 (2006).

Critical Factors Affecting Schedule Performance: Evidence from Indian Construction Projects — K. C. Iyer and K. N. Jha; 132 (8), 871-81 (2006).

Schools
Construction Delivery Systems: A Comparative Analysis of Their Performance within School Districts — David Col Debella and Robert Ries; 132 (11), 1131-8 (2006).

Sediment
Construction-Associated Solids Loads with a Temporary Sediment Control BMP — Theodore G. Cleveland and Adebola Fashokun; 132 (10), 1122-5 (2006).

Selection
Contractor Selection Criteria: Investigation of Opinions of Singapore Construction Practitioners — D. Singh and Robert L. K. Tiong; 132 (9), 998-1008 (2006).

Classifying Construction Contractors Using Unsupervised-Learning Neural Networks — Ashraf M. Elazouni; 132 (12), 1242-53 (2006).

Service life
Markov-Based Optimization Model for Building Facilities Management — Xueqing Zhang; 132 (11), 1203-11 (2006).

Simulation
Automated Statistical Analysis in Stochastic Project Scheduling Simulation — Dong-Eun Lee and David Arditi; 132 (3), 268-77 (2006).

Application of Lean Concepts and Simulation Analysis to Improve Efficiency of Drainage Operations Maintenance Crews — Albert Agbulos, Yasser Mohamed, Mohamed Al-Hussein, Simaan AbouRizk, and John Roesch; 132 (3), 291-9 (2006).

Reliability and Stability Buffering Approach: Focusing on the Issues of Errors and Changes in Concurrent Design and Construction Projects — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 132 (5), 452-64 (2006).

Bayesian Updating Application into Simulation in the North Edmonton Sanitary Trunk Tunnel Project — Tae Hwan Chung, Yasser Mohamed, and Simaan AbouRizk; 132 (8), 882-94 (2006).

Stimulating Construction Innovation in Singapore through the National System of Innovation — Lim Jay Na, George Ofori, and Moonseo Park; 132 (10), 1069-82 (2006).

Modeling and Analyzing the Impact of Technology on Data Capture and Transfer Processes at Construction Sites: A Case Study — Burcu Akinci, Semiha Kiziltas, Esin Ergen, Itir Z. Karaesmen, and Fuat Keceli; 132 (11), 1148-57 (2006).

Particle Swarm Optimization-Supported Simulation for Construction Operations — Hong Zhang, C. M. Tam, Heng Li, and Jonathan Jingsheng Shi; 132 (12), 1267-74 (2006).

Simulation models
Application Framework for Mapping and Simulation of Waste Handling Processes in Construction — Ming Lu, Chi-Sun Poon, and Lap-Chi Wong; 132 (11), 1212-21 (2006).

Singapore
Contractor Selection Criteria: Investigation of Opinions of Singapore Construction Practitioners — D. Singh and Robert L. K. Tiong; 132 (9), 998-1008 (2006).

Stimulating Construction Innovation in Singapore through the National System of Innovation — Lim Jay Na, George Ofori, and Moonseo Park; 132 (10), 1069-82 (2006).

Site evaluation
Computer-Aided Site Layout Planning — Farnaz Sadeghpour, Osama Moselhi, and Sabah T. Alkass; 132 (2), 143-51 (2006).

Minimizing Construction-Related Hazards in Airport Expansion Projects — Ahmed Khalafallah and Khaled El-Rayes; 132 (6), 562-72 (2006).

Site preparation, construction
Computer-Aided Site Layout Planning — Farnaz Sadeghpour, Osama Moselhi, and Sabah T. Alkass; 132 (2), 143-51 (2006).

Minimizing Construction-Related Hazards in Airport Expansion Projects — Ahmed Khalafallah and Khaled El-Rayes; 132 (6), 562-72 (2006).

Social factors
Exploratory Study of Knowledge Sharing in Contracting Companies: A Sociotechnical Perspective — Patrick Sik-wah Fong and Lily Chu; 132 (9), 928-39 (2006).

Spain
Downside Risks in Construction Projects Developed by the Civil Service: The Case of Spain — M. Pilar de la Cruz, Alfredo del Caño, and Elisa de la Cruz; 132 (8), 844-52 (2006).

Spatial analysis
Computer-Aided Site Layout Planning — Farnaz Sadeghpour, Osama Moselhi, and Sabah T. Alkass; 132 (2), 143-51 (2006).

Spreadsheets
Determining Attribute Weights in a CBR Model for Early Cost Prediction of Structural Systems — Sevgi Zeynep Doğan, David Arditi, and H. Murat Günaydın; 132 (10), 1092-8 (2006).

Standards
Survey of the Construction Industry Relative to the Use of CPM Scheduling for Construction Projects — Patricia D. Galloway; 132 (7), 697-711 (2006).

Comparative Study of University Courses on Critical-Path Method Scheduling — Patricia D. Galloway; 132 (7), 712-22 (2006).

Statistics
Automated Statistical Analysis in Stochastic Project Scheduling Simulation — Dong-Eun Lee and David Arditi; 132 (3), 268-77 (2006).

Construction Delivery Systems: A Comparative Analysis of Their Performance within School Districts — David Col Debella and Robert Ries; 132 (11), 1131-8 (2006).

Classifying Construction Contractors Using Unsupervised-Learning Neural Networks — Ashraf M. Elazouni; 132 (12), 1242-53 (2006).

Stochastic models
Decision Tree Modeling Using Integrated Multilevel Stochastic Networks — Mohamed Moussa, Janaka Ruwanpura, and George Jergeas; 132 (12), 1254-66 (2006).

Stochastic processes
Markov-Based Optimization Model for Building Facilities Management — Xueqing Zhang; 132 (11), 1203-11 (2006).

Stormwater management
Construction-Associated Solids Loads with a Temporary Sediment Control BMP — Theodore G. Cleveland and Adebola Fashokun; 132 (10), 1122-5 (2006).

Struts
Innovative Central Opening Strut System for Foundation Excavation — Min-Lung Yang, Sheng-Jin Chen, and Shun-Tyan Chen; 132 (1), 58-66 (2006).

Subcontractors
Proposed Subcontractor-Based Employee Motivational Model — Robert F. Cox, Raja R. A. Issa, and Aimee Frey; 132 (2), 152-63 (2006).

Subsurface environment
Intelligent Utility Locating Tool for Excavators — Bopanna T. Kolera and Leonhard E. Bernold; 132 (9), 919-27 (2006).

Superstructures
Constructability Analysis of the Bridge Superstructure Rotation Construction Method in China — J. Zhang and T. E. El-Diraby; 132 (4), 353-62 (2006).

Surveys
Survey of the Construction Industry Relative to the Use of CPM Scheduling for Construction Projects — Patricia D. Galloway; 132 (7), 697-711 (2006).

Sustainable development
Examining the Business Impact of Owner Commitment to Sustainability — Salwa M. A. Beheiry, Wai Kiong Chong, and Carl T. Haas; 132 (4), 384-92 (2006).

Lean Processes for Sustainable Project Delivery — Anthony R. Lapinski, Michael J. Horman, and David R. Riley; 132 (10), 1083-91 (2006).

Technology
Structural Insulated Panels: Impact on the Residential Construction Process — Michael A. Mullens and Mohammed Arif; 132 (7), 786-94 (2006).

Systems Analysis of Technical Advancement in Earthmoving Equipment — C. B. Tatum, Michael Vorster, Mac G. Klingler, and Boyd C. Paulson; 132 (9), 976-86 (2006).

Innovations in Earthmoving Equipment: New Forms and Their Evolution — C. B. Tatum, Michael Vorster, and Mac Klingler; 132 (9), 987-97 (2006).

Technology assessment
Construction IT Decision Making Using Multiattribute Utility Theory for Use in a Laboratory Information Management System — Tarek Elmisalami, Russell Walters, and Edward J. Jaselskis; 132 (12), 1275-83 (2006).

Terrorism
Lessons Learned from an Emergency Bridge Replacement Project — Yong Bai, William R. Burkett, and Phillip T. Nash; 132 (4), 338-44 (2006).

Texas
Crew Production Rates for Contract Time Estimation: Beam Erection, Deck, and Rail of Highway Bridges — James T. O'Connor and Youngki Huh; 132 (4), 408-15 (2006).

Time factors
Application of Lean Concepts and Simulation Analysis to Improve Efficiency of Drainage Operations Maintenance Crews — Albert Agbulos, Yasser Mohamed, Mohamed Al-Hussein, Simaan AbouRizk, and John Roesch; 132 (3), 291-9 (2006).

Tracking
Integration of Construction As-Built Data Via Laser Scanning with Geotechnical Monitoring of Urban Excavation — Y. Y. Su, Y. M. A. Hashash, and L. Y. Liu; 132 (12), 1234-41 (2006).

Training
What Does the Construction Industry Value in Its Workers? — Issam M. Srour, Carl T. Haas, and John D. Borcherding; 132 (10), 1053-8 (2006).

Linear Programming Approach to Optimize Strategic Investment in the Construction Workforce — Issam M. Srour, Carl T. Haas, and David P. Morton; 132 (11), 1158-66 (2006).

Travel time

Using GPS to Measure the Impact of Construction Activities on Rural Interstates — Camilo Garcia, Ryan Huebschman, Dulcy M. Abraham, and Darcy M. Bullock; 132 (5), 508-15 (2006).

Tunneling

Bayesian Updating Application into Simulation in the North Edmonton Sanitary Trunk Tunnel Project — Tae Hwan Chung, Yasser Mohamed, and Simaan AbouRizk; 132 (8), 882-94 (2006).

Uncertainty principles

Infrastructure Development and Expansion under Uncertainty: A Risk-Preference-Based Lattice Approach — Tong Zhao and Chung C. Fu; 132 (6), 620-5 (2006).

Underground construction

Integration of Construction As-Built Data Via Laser Scanning with Geotechnical Monitoring of Urban Excavation — Y. Y. Su, Y. M. A. Hashash, and L. Y. Liu; 132 (12), 1234-41 (2006).

United Kingdom

Safety Hazard Identification on Construction Projects — Gregory Carter and Simon D. Smith; 132 (2), 197-205 (2006).

Utilities

Intelligent Utility Locating Tool for Excavators — Bopanna T. Kolera and Leonhard E. Bernold; 132 (9), 919-27 (2006).

Validation

Statistical Considerations for Predicting Residual Value of Heavy Equipment — Gunnar Lucko, Christine M. Anderson-Cook, and Michael C. Vorster; 132 (7), 723-32 (2006).

Value engineering

Public Clients' Best Value Perspectives of Public Private Partnerships in Infrastructure Development — Xueqing Zhang; 132 (2), 107-14 (2006).

Waste management

Application Framework for Mapping and Simulation of Waste Handling Processes in Construction — Ming Lu, Chi-Sun Poon, and Lap-Chi Wong; 132 (11), 1212-21 (2006).

Water pollution

Construction-Associated Solids Loads with a Temporary Sediment Control BMP — Theodore G. Cleveland and Adebola Fashokun; 132 (10), 1122-5 (2006).

Water quality

Construction-Associated Solids Loads with a Temporary Sediment Control BMP — Theodore G. Cleveland and Adebola Fashokun; 132 (10), 1122-5 (2006).

Water resources

Management and Construction of the Three Gorges Project — Huichao Dai, Guangjing Cao, and Huaizhi Su; 132 (6), 615-9 (2006).

Weighing devices

Entropy Application to Improve Construction Finance Decisions — C. M. Tang, A. Y. T. Leung, and K. C. Lam; 132 (10), 1099-113 (2006).

Workspace

Lighting Requirements for Nighttime Highway Construction — Khalied Hyari and Khaled El-Rayes; 132 (5), 435-43 (2006).

Critical Space Analysis — Graham M. Winch and Steve North; 132 (5), 473-81 (2006).

Using GPS to Measure the Impact of Construction Activities on Rural Interstates — Camilo Garcia, Ryan Huebschman, Dulcy M. Abraham, and Darcy M. Bullock; 132 (5), 508-15 (2006).

Author Index

Abdul-Rahman, H.
Delay Mitigation in the Malaysian Construction Industry — H. Abdul-Rahman, M. A. Berawi, A. R. Berawi, O. Mohamed, M. Othman, and I. A. Yahya; 132 (2), 125-33 (2006).

AbouRizk, Simaan M.
Application of Lean Concepts and Simulation Analysis to Improve Efficiency of Drainage Operations Maintenance Crews — Albert Agbulos, Yasser Mohamed, Mohamed Al-Hussein, Simaan AbouRizk, and John Roesch; 132 (3), 291-9 (2006).
Bayesian Updating Application into Simulation in the North Edmonton Sanitary Trunk Tunnel Project — Tae Hwan Chung, Yasser Mohamed, and Simaan AbouRizk; 132 (8), 882-94 (2006).
Residential Construction Lot Grading Approval Process Optimization: Case Study of City of Edmonton — Vishal Sharma, Mohamed Al-Hussein, and Simaan M. AbouRizk; 132 (12), 1225-33 (2006).

Abraham, Dulcy M.
Using GPS to Measure the Impact of Construction Activities on Rural Interstates — Camilo Garcia, Ryan Huebschman, Dulcy M. Abraham, and Darcy M. Bullock; 132 (5), 508-15 (2006).

Agbulos, Albert
Application of Lean Concepts and Simulation Analysis to Improve Efficiency of Drainage Operations Maintenance Crews — Albert Agbulos, Yasser Mohamed, Mohamed Al-Hussein, Simaan AbouRizk, and John Roesch; 132 (3), 291-9 (2006).

Aibinu, Ajibade Ayodeji
Construction Delays and Their Causative Factors in Nigeria — Ajibade Ayodeji Aibinu and Henry Agboola Odeyinka; 132 (7), 667-77 (2006).

Akinci, Burcu
Modeling and Analyzing the Impact of Technology on Data Capture and Transfer Processes at Construction Sites: A Case Study — Burcu Akinci, Semiha Kiziltas, Esin Ergen, Itir Z. Karaesmen, and Fuat Keceli; 132 (11), 1148-57 (2006).

Al-Ghassani, Ahmed M.
Prototype System for Knowledge Problem Definition — Ahmed M. Al-Ghassani, John M. Kamara, Chimay J. Anumba, and Patricia M. Carrillo; 132 (5), 516-24 (2006).

Al-Hussein, Mohamed
Application of Lean Concepts and Simulation Analysis to Improve Efficiency of Drainage Operations Maintenance Crews — Albert Agbulos, Yasser Mohamed, Mohamed Al-Hussein, Simaan AbouRizk, and John Roesch; 132 (3), 291-9 (2006).
Residential Construction Lot Grading Approval Process Optimization: Case Study of City of Edmonton — Vishal Sharma, Mohamed Al-Hussein, and Simaan M. AbouRizk; 132 (12), 1225-33 (2006).

Alkass, Sabah T.
Computer-Aided Site Layout Planning — Farnaz Sadeghpour, Osama Moselhi, and Sabah T. Alkass; 132 (2), 143-51 (2006).
Forecasting Project Status by Using Fuzzy Logic — J. Li, O. Moselhi, and S. Alkass; 132 (11), 1193-202 (2006).

Anderson, Stuart D.
Relative Effectiveness of Project Delivery and Contract Strategies — Adetokunbo A. Oyetunji and Stuart D. Anderson; 132 (1), 3-13 (2006).

Anderson-Cook, Christine M.
Statistical Considerations for Predicting Residual Value of Heavy Equipment — Gunnar Lucko, Christine M. Anderson-Cook, and Michael C. Vorster; 132 (7), 723-32 (2006).

Anumba, Chimay J.
Prototype System for Knowledge Problem Definition — Ahmed M. Al-Ghassani, John M. Kamara, Chimay J. Anumba, and Patricia M. Carrillo; 132 (5), 516-24 (2006).

Arditi, David
Total Quality Performance of Design/Build Firms Using Quality Function Deployment — Dong-Eun Lee and David Arditi; 132 (1), 49-57 (2006).
Automated Statistical Analysis in Stochastic Project Scheduling Simulation — Dong-Eun Lee and David Arditi; 132 (3), 268-77 (2006).
Determining Attribute Weights in a CBR Model for Early Cost Prediction of Structural Systems — Sevgi Zeynep Doğan, David Arditi, and H. Murat Günaydın; 132 (10), 1092-8 (2006).

Arif, Mohammed
Structural Insulated Panels: Impact on the Residential Construction Process — Michael A. Mullens and Mohammed Arif; 132 (7), 786-94 (2006).

Austeng, Kjell
Procurement Routes in Public Building and Construction Projects — Ola Lædre, Kjell Austeng, Tore I. Haugen, and Ole Jonny Klakegg; 132 (7), 689-96 (2006).

Bai, Yong
Lessons Learned from an Emergency Bridge Replacement Project — Yong Bai, William R. Burkett, and Phillip T. Nash; 132 (4), 338-44 (2006).
Rapid Bridge Replacement: Processes, Techniques, and Needs for Improvements — Yong Bai and William R. Burkett; 132 (11), 1139-47 (2006).

Baldwin, Andrew N.
Discussion of "Waste-Based Management in Residential Construction" by Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold — Zhen Chen, Heng Li, and Andrew N. Baldwin; 132 (9), 1019 (2006).

Baradan, Selim
Comparative Injury and Fatality Risk Analysis of Building Trades — Selim Baradan and Mumtaz A. Usmen; 132 (5), 533-9 (2006).

Bayraktar, Mehmet Emre
Warranty Bonds from the Perspective of Surety Companies — Mehmet Emre Bayraktar, Qingbin Cui, Makarand Hastak, and Issam Minkarah; 132 (4), 333-7 (2006).

Beavers, J. E.
Crane-Related Fatalities in the Construction Industry — J. E. Beavers, J. R. Moore, R. Rinehart, and W. R. Schriver; 132 (9), 901-10 (2006).

Beheiry, Salwa M. A.
Examining the Business Impact of Owner Commitment to Sustainability — Salwa M. A. Beheiry, Wai Kiong Chong, and Carl T. Haas; 132 (4), 384-92 (2006).

Berawi, A. R.
Delay Mitigation in the Malaysian Construction Industry — H. Abdul-Rahman, M. A. Berawi, A. R. Berawi, O. Mohamed, M. Othman, and I. A. Yahya; 132 (2), 125-33 (2006).

Berawi, M. A.
Delay Mitigation in the Malaysian Construction Industry — H. Abdul-Rahman, M. A. Berawi, A. R. Berawi, O. Mohamed, M. Othman, and I. A. Yahya; 132 (2), 125-33 (2006).

Bernold, Leonhard E.
Intelligent Utility Locating Tool for Excavators — Bopanna T. Kolera and Leonhard E. Bernold; 132 (9), 919-27 (2006).
Experimental Assessment of Wireless Communication Technologies — Suchart Nuntasunti and Leonhard E. Bernold; 132 (9), 1009-18 (2006).
Closure to "Waste-Based Management in Residential Construction" by Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold — Jing Zhang, Danelle L. Eastham (Ralph), and Leonhard E. Bernold; 132 (9), 1019-21 (2006).

Birgonul, M. Talat
Case-Based Reasoning Model for International Market Selection — Beliz Ozorhon, Irem Dikmen, and M. Talat Birgonul; 132 (9), 940-8 (2006).

Borcherding, John D.
What Does the Construction Industry Value in Its Workers? — Issam M. Srour, Carl T. Haas, and John D. Borcherding; 132 (10), 1053-8 (2006).

Brilakis, Ioannis
Multimodal Image Retrieval from Construction Databases and Model-Based Systems — Ioannis Brilakis and Lucio Soibelman; 132 (7), 777-85 (2006).

Bröchner, J.
Price and Nonprice Criteria for Contractor Selection — F. Waara and J. Bröchner; 132 (8), 797-804 (2006).

Bullock, Darcy M.
Using GPS to Measure the Impact of Construction Activities on Rural Interstates — Camilo Garcia, Ryan Huebschman, Dulcy M. Abraham, and Darcy M. Bullock; 132 (5), 508-15 (2006).

Burkett, William R.
Lessons Learned from an Emergency Bridge Replacement Project — Yong Bai, William R. Burkett, and Phillip T. Nash; 132 (4), 338-44 (2006).

Rapid Bridge Replacement: Processes, Techniques, and Needs for Improvements — Yong Bai and William R. Burkett; 132 (11), 1139-47 (2006).

Caldas, Carlos H.

Using Global Positioning System to Improve Materials-Locating Processes on Industrial Projects — Carlos H. Caldas, David Grau Torrent, and Carl T. Haas; 132 (7), 741-9 (2006).

Tracking the Location of Materials on Construction Job Sites — Jongchul Song, Carl T. Haas, and Carlos H. Caldas; 132 (9), 911-8 (2006).

Cao, Guangjing

Management and Construction of the Three Gorges Project — Huichao Dai, Guangjing Cao, and Huaizhi Su; 132 (6), 615-9 (2006).

Carrillo, Patricia M.

Prototype System for Knowledge Problem Definition — Ahmed M. Al-Ghassani, John M. Kamara, Chimay J. Anumba, and Patricia M. Carrillo; 132 (5), 516-24 (2006).

Carter, Gregory

Safety Hazard Identification on Construction Projects — Gregory Carter and Simon D. Smith; 132 (2), 197-205 (2006).

Chan, Charles K. L.

MAUT-Based Dispute Resolution Selection Model Prototype for International Construction Projects — Edwin H. W. Chan, Henry C. H. Suen, and Charles K. L. Chan; 132 (5), 444-51 (2006).

Chan, Edwin H. W.

MAUT-Based Dispute Resolution Selection Model Prototype for International Construction Projects — Edwin H. W. Chan, Henry C. H. Suen, and Charles K. L. Chan; 132 (5), 444-51 (2006).

Chen, Sheng-Jin

Innovative Central Opening Strut System for Foundation Excavation — Min-Lung Yang, Sheng-Jin Chen, and Shun-Tyan Chen; 132 (1), 58-66 (2006).

Chen, Shun-Tyan

Innovative Central Opening Strut System for Foundation Excavation — Min-Lung Yang, Sheng-Jin Chen, and Shun-Tyan Chen; 132 (1), 58-66 (2006).

Chen, Yang

Safety Climate in Construction Industry: A Case Study in Hong Kong — Dongping Fang, Yang Chen, and Louisa Wong; 132 (6), 573-84 (2006).

Chen, Zhen

Discussion of "Risks in Chinese Construction Market—Contractors' Perspective" by Dongping Fang, Mingen Li, Patrick Sik-wah Fong, and Liyin Shen — Zhen Chen and Heng Li; 132 (3), 327-8 (2006).

Discussion of "Waste-Based Management in Residential Construction" by Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold — Zhen Chen, Heng Li, and Andrew N. Baldwin; 132 (9), 1019 (2006).

Cheng, Eddie W. L.

Job Performance Evaluation for Construction Companies: An Analytic Network Process Approach — Eddie W. L. Cheng and Heng Li; 132 (8), 827-35 (2006).

Cheng, W. F.

Discussion of "Determination of Haul Distance and Direction in Mass Excavation" by Jaeho Son, Kris G. Mattila, and Donald S. Myers — W. F. Cheng, L. Liu, and M. G. Satish; 132 (8), 895-6 (2006).

Cheung, Sai On

A Study of Styles and Outcomes in Construction Dispute Negotiation — Sai On Cheung, Tak Wing Yiu Yiu, and Sau Fung Yeung; 132 (8), 805-14 (2006).

Logistic Likelihood Analysis of Mediation Outcomes — Tak Wing Yiu, Sai On Cheung, and Fung Man Mok; 132 (10), 1026-36 (2006).

Chien, Sheng-Fen

Exploring the Bidding Situation for Economically Most Advantageous Tender Projects Using a Bidding Game — Yeng-Horng Perng, Yi-Kai Juan, and Sheng-Fen Chien; 132 (10), 1037-42 (2006).

Chong, Wai Kiong

Examining the Business Impact of Owner Commitment to Sustainability — Salwa M. A. Beheiry, Wai Kiong Chong, and Carl T. Haas; 132 (4), 384-92 (2006).

Chu, Lily

Exploratory Study of Knowledge Sharing in Contracting Companies: A Sociotechnical Perspective — Patrick Sik-wah Fong and Lily Chu; 132 (9), 928-39 (2006).

Chua, David K. H.

Use of a WBS Matrix to Improve Interface Management in Projects — David K. H. Chua and Myriam Godinot; 132 (1), 67-79 (2006).

Modeling of Functional Construction Requirements for Constructability Analysis — Yuanbin Song and David K. H. Chua; 132 (12), 1314-26 (2006).

Chung, Tae Hwan

Bayesian Updating Application into Simulation in the North Edmonton Sanitary Trunk Tunnel Project — Tae Hwan Chung, Yasser Mohamed, and Simaan AbouRizk; 132 (8), 882-94 (2006).

Cleveland, Theodore G.

Construction-Associated Solids Loads with a Temporary Sediment Control BMP — Theodore G. Cleveland and Adebola Fashokun; 132 (10), 1122-5 (2006).

Connolly, Joseph P.

Discussion of "Bid Compensation Decision Model for Projects with Costly Bid Preparation" by S. Ping Ho — Joseph P. Connolly; 132 (4), 429-30 (2006).

Discussion of "Modeling a Contractor's Markup Estimation" by Min Liu and Yean Yng Ling — Joseph P. Connolly; 132 (6), 657-8 (2006).

Cottrell, David S.

Contractor Process Improvement for Enhancing Construction Productivity — David S. Cottrell; 132 (2), 189-96 (2006).

Cox, Robert F.

Proposed Subcontractor-Based Employee Motivational Model — Robert F. Cox, Raja R. A. Issa, and Aimee Frey; 132 (2), 152-63 (2006).

Cui, Qingbin

Warranty Bonds from the Perspective of Surety Companies — Mehmet Emre Bayraktar, Qingbin Cui, Makarand Hastak, and Issam Minkarah; 132 (4), 333-7 (2006).

Dai, Huichao

Management and Construction of the Three Gorges Project — Huichao Dai, Guangjing Cao, and Huaizhi Su; 132 (6), 615-9 (2006).

Dainty, A. R. J.

Empirical Evaluation of Structural Frame Performance Criteria: Realizing the Potential of Hybrid Concrete Construction — R. Soetanto, A. R. J. Dainty, J. Glass, and A. D. F. Price; 132 (3), 278-90 (2006).

Davis, Gary

Physical Risk Factors and Controls for Musculoskeletal Disorders in Construction Trades — Peregrin Spielholz, Gary Davis, and Jason Griffith; 132 (10), 1059-68 (2006).

de la Cruz, Elisa

Downside Risks in Construction Projects Developed by the Civil Service: The Case of Spain — M. Pilar de la Cruz, Alfredo del Caño, and Elisa de la Cruz; 132 (8), 844-52 (2006).

de la Cruz, M. Pilar

Downside Risks in Construction Projects Developed by the Civil Service: The Case of Spain — M. Pilar de la Cruz, Alfredo del Caño, and Elisa de la Cruz; 132 (8), 844-52 (2006).

de la Garza, Jesús M.

Closure to "Critical Path Method with Multiple Calendars" by Kyunghwan Kim and Jesús M. de la Garza — Jesús M. de la Garza and Kyunghwan Kim; 132 (5), 543 (2006).

Closure to "Evaluation of the Resource-Constrained Critical Path Method Algorithms" by Kyunghwan Kim and Jesús M. de la Garza — Kyunghwan Kim and Jesús M. de la Garza; 132 (10), 1128 (2006).

Debella, David Col

Construction Delivery Systems: A Comparative Analysis of Their Performance within School Districts — David Col Debella and Robert Ries; 132 (11), 1131-8 (2006).

del Caño, Alfredo

Downside Risks in Construction Projects Developed by the Civil Service: The Case of Spain — M. Pilar de la Cruz, Alfredo del Caño, and Elisa de la Cruz; 132 (8), 844-52 (2006).

Devenport, Jenny N.

Analysis of Construction Worker Injuries That Do Not Result in Lost Time — Jimmie Hinze, Jenny N. Devenport, and Geneva Giang; 132 (3), 321-6 (2006).

Dikmen, Irem

Case-Based Reasoning Model for International Market Selection — Beliz Ozorhon, Irem Dikmen, and M. Talat Birgonul; 132 (9), 940-8 (2006).

Doğan, Sevgi Zeynep

Determining Attribute Weights in a CBR Model for Early Cost Prediction of Structural Systems — Sevgi Zeynep Doğan, David Arditi, and H. Murat Günaydın; 132 (10), 1092-8 (2006).

Drew, Derek S.

Testing Vickery's Revenue Equivalence Theory in Construction Auctions — Derek S. Drew and Martin Skitmore; 132 (4), 425-8 (2006).

Strengths, Weaknesses, Opportunities, and Threats for Foreign-Invested Construction Enterprises: A China Study — Li Yin Shen, Zhen Yu Zhao, and Derek S. Drew; 132 (9), 966-75 (2006).

Duffield, Colin F.

Partnering Mechanism in Construction: An Empirical Study on the Chinese Construction Industry — Wenzhe Tang, Colin F. Duffield, and David M. Young; 132 (3), 217-29 (2006).

Dzeng, Ren-Jye
Identifying a Design Management Package to Support Concurrent Design in Building Wafer Fabrication Facilities — Ren-Jye Dzeng; 132 (6), 606-14 (2006).
East, E. William
Multiproject Planning and Resource Controls for Facility Management — E. William East and Liang Y. Liu; 132 (12), 1294-305 (2006).
Eastham (Ralph), Danelle L.
Closure to "Waste-Based Management in Residential Construction" by Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold — Jing Zhang, Danelle L. Eastham (Ralph), and Leonhard E. Bernold; 132 (9), 1019-21 (2006).
Elazouni, Ashraf M.
Classifying Construction Contractors Using Unsupervised-Learning Neural Networks — Ashraf M. Elazouni; 132 (12), 1242-53 (2006).
El-Diraby, Tamer E.
Web-Services Environment for Collaborative Management of Product Life-Cycle Costs — Tamer E. El-Diraby; 132 (3), 300-13 (2006).
Constructability Analysis of the Bridge Superstructure Rotation Construction Method in China — J. Zhang and T. E. El-Diraby; 132 (4), 353-62 (2006).
Ellis, Ralph, Jr.
Measuring Project Level Productivity on Transportation Projects — Ralph D. Ellis, Jr., and Seunghyun Lee; 132 (3), 314-20 (2006).
El-Mashaleh, Mohammad
Firm Performance and Information Technology Utilization in the Construction Industry — Mohammad El-Mashaleh, William J. O'Brien, and R. Edward Minchin, Jr.; 132 (5), 499-507 (2006).
Elmisalami, Tarek
Construction IT Decision Making Using Multiattribute Utility Theory for Use in a Laboratory Information Management System — Tarek Elmisalami, Russell Walters, and Edward J. Jaselskis; 132 (12), 1275-83 (2006).
El-Rayes, Khaled
Lighting Requirements for Nighttime Highway Construction — Khalied Hyari and Khaled El-Rayes; 132 (5), 435-43 (2006).
Parallel Genetic Algorithms for Optimizing Resource Utilization in Large-Scale Construction Projects — Amr Kandil and Khaled El-Rayes; 132 (5), 491-8 (2006).
Minimizing Construction-Related Hazards in Airport Expansion Projects — Ahmed Khalafallah and Khaled El-Rayes; 132 (6), 562-72 (2006).
El Wardani, Marwa A.
Comparing Procurement Methods for Design-Build Projects — Marwa A. El Wardani, John I. Messner, and Michael J. Horman; 132 (3), 230-8 (2006).
Emsley, Margaret W.
Predicting Construction Cost Using Multiple Regression Techniques — David J. Lowe, Margaret W. Emsley, and Anthony Harding; 132 (7), 750-8 (2006).
Ergen, Esin
Modeling and Analyzing the Impact of Technology on Data Capture and Transfer Processes at Construction Sites: A Case Study — Burcu Akinci, Semiha Kiziltas, Esin Ergen, Itir Z. Karaesmen, and Fuat Keceli; 132 (11), 1148-57 (2006).
Ezeldin, A. Samer
Neural Networks for Estimating the Productivity of Concreting Activities — A. Samer Ezeldin and Lokman M. Sharara; 132 (6), 650-6 (2006).
Fan, Su-Ling
Object-Oriented Scheduling for Repetitive Projects with Soft Logics — Su-Ling Fan and H. P. Tserng; 132 (1), 35-48 (2006).
Fang, Dongping
Closure to "Risks in Chinese Construction Market—Contractors' Perspective" by Dongping Fang, Mingen Li, Patrick Sik-wah Fong, and Liyin Shen — Dongping Fang, Difei Zhu, Patrick Sik-wah Fong, Mingen Li, and Liyin Shen; 132 (3), 328-9 (2006).
Safety Climate in Construction Industry: A Case Study in Hong Kong — Dongping Fang, Yang Chen, and Louisa Wong; 132 (6), 573-84 (2006).
Fashokun, Adebola
Construction-Associated Solids Loads with a Temporary Sediment Control BMP — Theodore G. Cleveland and Adebola Fashokun; 132 (10), 1122-5 (2006).
Fong, Patrick Sik-wah
Closure to "Risks in Chinese Construction Market—Contractors' Perspective" by Dongping Fang, Mingen Li, Patrick Sik-wah Fong, and Liyin Shen — Dongping Fang, Difei Zhu, Patrick Sik-wah Fong, Mingen Li, and Liyin Shen; 132 (3), 328-9 (2006).
Exploratory Study of Knowledge Sharing in Contracting Companies: A Sociotechnical Perspective — Patrick Sik-wah Fong and Lily Chu; 132 (9), 928-39 (2006).
Francis, Adel
Discussion of "Critical Path Method with Multiple Calendars" by Kyunghwan Kim and Jesús M. de la Garza — Adel Francis and Edmond Miresco; 132 (5), 542-3 (2006).
Frey, Aimee
Proposed Subcontractor-Based Employee Motivational Model — Robert F. Cox, Raja R. A. Issa, and Aimee Frey; 132 (2), 152-63 (2006).
Fu, Chung C.
Infrastructure Development and Expansion under Uncertainty: A Risk-Preference-Based Lattice Approach — Tong Zhao and Chung C. Fu; 132 (6), 620-5 (2006).
Fung, Ivan W. H.
Construction Delays in Hong Kong Civil Engineering Projects — Tommy Y. Lo, Ivan W. H. Fung, and Karen C. F. Tung; 132 (6), 636-49 (2006).
Galloway, Patricia D.
Survey of the Construction Industry Relative to the Use of CPM Scheduling for Construction Projects — Patricia D. Galloway; 132 (7), 697-711 (2006).
Comparative Study of University Courses on Critical-Path Method Scheduling — Patricia D. Galloway; 132 (7), 712-22 (2006).
Gambatese, John
Constructability State of Practice Report — James B. Pocock, Steven T. Kuennen, John Gambatese, and Jon Rauschkolb; 132 (4), 373-83 (2006).
Gao, Zhili
Approaches to Improving the Quality of Construction Drawings from Owner's Perspective — Zhili Gao, Russell C. Walters, Edward J. Jaselskis, and Terry J. Wipf; 132 (11), 1187-92 (2006).
Garcia, Camilo
Using GPS to Measure the Impact of Construction Activities on Rural Interstates — Camilo Garcia, Ryan Huebschman, Dulcy M. Abraham, and Darcy M. Bullock; 132 (5), 508-15 (2006).
Giang, Geneva
Analysis of Construction Worker Injuries That Do Not Result in Lost Time — Jimmie Hinze, Jenny N. Devenport, and Geneva Giang; 132 (3), 321-6 (2006).
Glass, J.
Empirical Evaluation of Structural Frame Performance Criteria: Realizing the Potential of Hybrid Concrete Construction — R. Soetanto, A. R. J. Dainty, J. Glass, and A. D. F. Price; 132 (3), 278-90 (2006).
Godinot, Myriam
Use of a WBS Matrix to Improve Interface Management in Projects — David K. H. Chua and Myriam Godinot; 132 (1), 67-79 (2006).
Goren, Ytzhak D.
Moving a Reinforced-Concrete Building: Case Study — Dory Telem, Aviad Shapira, Ytzhak D. Goren, and Cliff J. Schexnayder; 132 (2), 115-24 (2006).
Griffith, Jason
Physical Risk Factors and Controls for Musculoskeletal Disorders in Construction Trades — Peregrin Spielholz, Gary Davis, and Jason Griffith; 132 (10), 1059-68 (2006).
Günaydın, H. Murat
Determining Attribute Weights in a CBR Model for Early Cost Prediction of Structural Systems — Sevgi Zeynep Doğan, David Arditi, and H. Murat Günaydın; 132 (10), 1092-8 (2006).
Haas, Carl T.
Examining the Business Impact of Owner Commitment to Sustainability — Salwa M. A. Beheiry, Wai Kiong Chong, and Carl T. Haas; 132 (4), 384-92 (2006).
Using Global Positioning System to Improve Materials-Locating Processes on Industrial Projects — Carlos H. Caldas, David Grau Torrent, and Carl T. Haas; 132 (7), 741-9 (2006).
Tracking the Location of Materials on Construction Job Sites — Jongchul Song, Carl T. Haas, and Carlos H. Caldas; 132 (9), 911-8 (2006).
What Does the Construction Industry Value in Its Workers? — Issam M. Srour, Carl T. Haas, and John D. Borcherding; 132 (10), 1053-8 (2006).
Linear Programming Approach to Optimize Strategic Investment in the Construction Workforce — Issam M. Srour, Carl T. Haas, and David P. Morton; 132 (11), 1158-66 (2006).
Hanna, Awad S.
Closure to "Cumulative Effect of Project Changes for Electrical and Mechanical Construction" by Awad S. Hanna, Richard Camlic, Pehr A. Peterson, and Min-Jae Lee — Awad S. Hanna; 132 (5), 545-7 (2006).
Quantitative Measurement of Successful Performance from the Project Manager's Perspective — Cindy L. Menches and Awad S. Hanna; 132 (12), 1284-93 (2006).
Conceptual Planning Process for Electrical Construction — Cindy L. Menches and Awad S. Hanna; 132 (12), 1306-13 (2006).
Harding, Anthony
Predicting Construction Cost Using Multiple Regression Techniques — David J. Lowe, Margaret

W. Emsley, and Anthony Harding; 132 (7), 750-8 (2006).

Harvey, John T.

Fast-Track Urban Freeway Rehabilitation with 55-H Weekend Closures: I-710 Long Beach Case Study — Eul-Bum Lee, Hojung Lee, and John T. Harvey; 132 (5), 465-72 (2006).

Hashash, Y. M. A.

Integration of Construction As-Built Data Via Laser Scanning with Geotechnical Monitoring of Urban Excavation — Y. Y. Su, Y. M. A. Hashash, and L. Y. Liu; 132 (12), 1234-41 (2006).

Hastak, Makarand

Warranty Bonds from the Perspective of Surety Companies — Mehmet Emre Bayraktar, Qingbin Cui, Makarand Hastak, and Issam Minkarah; 132 (4), 333-7 (2006).

Haugen, Tore I.

Procurement Routes in Public Building and Construction Projects — Ola Lædre, Kjell Austeng, Tore I. Haugen, and Ole Jonny Klakegg; 132 (7), 689-96 (2006).

Hegab, Mohamed Y.

Developing a Complexity Measure for Project Schedules — Khaled M. Nassar and Mohamed Y. Hegab; 132 (6), 554-61 (2006).

Soil Penetration Modeling in Microtunneling Projects — Mohamed Hegab, Gary R. Smith, and Ossama M. Salem; 132 (6), 598-605 (2006).

Hegazy, Tarek

Computerized System for Efficient Delivery of Infrastructure Maintenance/Repair Programs — Tarek Hegazy; 132 (1), 26-34 (2006).

Conflict Resolution in Construction Disputes Using the Graph Model — Moustafa Kassab, Keith Hipel, and Tarek Hegazy; 132 (10), 1043-52 (2006).

Hinze, Jimmie

Owner's Role in Construction Safety — Xinyu Huang and Jimmie Hinze; 132 (2), 164-73 (2006).

Owner's Role in Construction Safety: Guidance Model — Xinyu Huang and Jimmie Hinze; 132 (2), 174-81 (2006).

Analysis of Construction Worker Injuries That Do Not Result in Lost Time — Jimmie Hinze, Jenny N. Devenport, and Geneva Giang; 132 (3), 321-6 (2006).

Hipel, Keith

Conflict Resolution in Construction Disputes Using the Graph Model — Moustafa Kassab, Keith Hipel, and Tarek Hegazy; 132 (10), 1043-52 (2006).

Ho, S. Ping

Closure to "Bid Compensation Decision Model for Projects with Costly Bid Preparation" by S. Ping Ho — S. Ping Ho; 132 (4), 430-1 (2006).

Model for Financial Renegotiation in Public-Private Partnership Projects and Its Policy Implications: Game Theoretic View — S. Ping Ho; 132 (7), 678-88 (2006).

Hoo, Wei Yee

Determinants of International Architectural, Engineering, and Construction Firms' Project Success in China — Florence Yean Yng Ling, C. William Ibbs, and Wei Yee Hoo; 132 (2), 206-14 (2006).

Horman, Michael J.

Fundamental Principles of Workforce Management — H. Randolph Thomas and Michael J. Horman; 132 (1), 97-104 (2006).

Comparing Procurement Methods for Design-Build Projects — Marwa A. El Wardani, John I. Messner, and Michael J. Horman; 132 (3), 230-8 (2006).

Sequence Planning for Electrical Construction — Michael J. Horman, Matthew P. Orosz, and David R. Riley; 132 (4), 363-72 (2006).

Lean Processes for Sustainable Project Delivery — Anthony R. Lapinski, Michael J. Horman, and David R. Riley; 132 (10), 1083-91 (2006).

Huang, Rong-yau

Non-Unit-Based Planning and Scheduling of Repetitive Construction Projects — Rong-yau Huang and Kuo-Shun Sun; 132 (6), 585-97 (2006).

Huang, Sen-Tien

3D Scan Information Management System for Construction Management — Naai-Jung Shih and Sen-Tien Huang; 132 (2), 134-42 (2006).

Huang, Xinyu

Owner's Role in Construction Safety — Xinyu Huang and Jimmie Hinze; 132 (2), 164-73 (2006).

Owner's Role in Construction Safety: Guidance Model — Xinyu Huang and Jimmie Hinze; 132 (2), 174-81 (2006).

Huebschman, Ryan

Using GPS to Measure the Impact of Construction Activities on Rural Interstates — Camilo Garcia, Ryan Huebschman, Dulcy M. Abraham, and Darcy M. Bullock; 132 (5), 508-15 (2006).

Huh, Youngki

Crew Production Rates for Contract Time Estimation: Beam Erection, Deck, and Rail of Highway Bridges — James T. O'Connor and Youngki Huh; 132 (4), 408-15 (2006).

Hunter, Kirsty

Investigation of Critical Success Factors in Construction Project Briefing by Way of Content Analysis — Ann T. W. Yu, Qiping Shen, John Kelly, and Kirsty Hunter; 132 (11), 1178-86 (2006).

Hyari, Khalied

Lighting Requirements for Nighttime Highway Construction — Khalied Hyari and Khaled El-Rayes; 132 (5), 435-43 (2006).

Ibbs, C. William

Determinants of International Architectural, Engineering, and Construction Firms' Project Success in China — Florence Yean Yng Ling, C. William Ibbs, and Wei Yee Hoo; 132 (2), 206-14 (2006).

Iledare, Wumi O.

The Gulf of Mexico Decommissioning Market — Mark J. Kaiser and Wumi O. Iledare; 132 (8), 815-26 (2006).

Issa, Raja R. A.

Proposed Subcontractor-Based Employee Motivational Model — Robert F. Cox, Raja R. A. Issa, and Aimee Frey; 132 (2), 152-63 (2006).

Iyer, K. C.

Critical Factors Affecting Schedule Performance: Evidence from Indian Construction Projects — K. C. Iyer and K. N. Jha; 132 (8), 871-81 (2006).

Jaselskis, Edward J.

Editor's Note — Edward J. Jaselskis; 132 (1), 1-2 (2006).

Editor's Note — Edward J. Jaselskis; 132 (2), 105-6 (2006).

Editor's Note — Edward J. Jaselskis; 132 (3), 215-6 (2006).

Editor's Note — Edward J. Jaselskis; 132 (4), 331-2 (2006).

Editor's Note — Edward J. Jaselskis; 132 (5), 433-4 (2006).

Memorial to Boyd Paulson Jr. — Edward J. Jaselskis; 132 (6), 549-51 (2006).

Editor's Note — Edward J. Jaselskis; 132 (6), 552-3 (2006).

Editor's Note — Edward J. Jaselskis; 132 (7), 665-6 (2006).

Editor's Note — Edward J. Jaselskis; 132 (8), 795-6 (2006).

Editor's Note — Edward J. Jaselskis; 132 (9), 899-900 (2006).

Editor's Note — Edward J. Jaselskis; 132 (10), 1023-4 (2006).

Editor's Note — Edward J. Jaselskis; 132 (11), 1129-30 (2006).

Approaches to Improving the Quality of Construction Drawings from Owner's Perspective — Zhili Gao, Russell C. Walters, Edward J. Jaselskis, and Terry J. Wipf; 132 (11), 1187-92 (2006).

Editor's Note — Edward J. Jaselskis; 132 (12), 1223-4 (2006).

Construction IT Decision Making Using Multiattribute Utility Theory for Use in a Laboratory Information Management System — Tarek Elmisalami, Russell Walters, and Edward J. Jaselskis; 132 (12), 1275-83 (2006).

Jaśkowski, Piotr

Scheduling Construction Projects Using Evolutionary Algorithm — Piotr Jaśkowski and Anna Sobotka; 132 (8), 861-70 (2006).

Jergeas, George

Decision Tree Modeling Using Integrated Multilevel Stochastic Networks — Mohamed Moussa, Janaka Ruwanpura, and George Jergeas; 132 (12), 1254-66 (2006).

Jha, K. N.

Critical Factors Affecting Schedule Performance: Evidence from Indian Construction Projects — K. C. Iyer and K. N. Jha; 132 (8), 871-81 (2006).

Juan, Yi-Kai

Exploring the Bidding Situation for Economically Most Advantageous Tender Projects Using a Bidding Game — Yeng-Horng Perng, Yi-Kai Juan, and Sheng-Fen Chien; 132 (10), 1037-42 (2006).

Kaiser, Mark J.

Offshore Decommissioning Cost Estimation in the Gulf of Mexico — Mark J. Kaiser; 132 (3), 249-58 (2006).

The Gulf of Mexico Decommissioning Market — Mark J. Kaiser and Wumi O. Iledare; 132 (8), 815-26 (2006).

Kamara, John M.

Prototype System for Knowledge Problem Definition — Ahmed M. Al-Ghassani, John M. Kamara, Chimay J. Anumba, and Patricia M. Carrillo; 132 (5), 516-24 (2006).

Kandil, Amr
Parallel Genetic Algorithms for Optimizing Resource Utilization in Large-Scale Construction Projects — Amr Kandil and Khaled El-Rayes; 132 (5), 491-8 (2006).
Karaesmen, Itir Z.
Modeling and Analyzing the Impact of Technology on Data Capture and Transfer Processes at Construction Sites: A Case Study — Burcu Akinci, Semiha Kiziltas, Esin Ergen, Itir Z. Karaesmen, and Fuat Keceli; 132 (11), 1148-57 (2006).
Kassab, Moustafa
Conflict Resolution in Construction Disputes Using the Graph Model — Moustafa Kassab, Keith Hipel, and Tarek Hegazy; 132 (10), 1043-52 (2006).
Keceli, Fuat
Modeling and Analyzing the Impact of Technology on Data Capture and Transfer Processes at Construction Sites: A Case Study — Burcu Akinci, Semiha Kiziltas, Esin Ergen, Itir Z. Karaesmen, and Fuat Keceli; 132 (11), 1148-57 (2006).
Kelly, John
Investigation of Critical Success Factors in Construction Project Briefing by Way of Content Analysis — Ann T. W. Yu, Qiping Shen, John Kelly, and Kirsty Hunter; 132 (11), 1178-86 (2006).
Khalafallah, Ahmed
Minimizing Construction-Related Hazards in Airport Expansion Projects — Ahmed Khalafallah and Khaled El-Rayes; 132 (6), 562-72 (2006).
Kim, Kyunghwan
Closure to "Critical Path Method with Multiple Calendars" by Kyunghwan Kim and Jesús M. de la Garza — Jesús M. de la Garza and Kyunghwan Kim; 132 (5), 543 (2006).
Closure to "Evaluation of the Resource-Constrained Critical Path Method Algorithms" by Kyunghwan Kim and Jesús M. de la Garza — Kyunghwan Kim and Jesús M. de la Garza; 132 (10), 1128 (2006).
Kim, Wooyoung
Evaluation Model for Information Systems Benefits in Construction Management Processes — Jung-Ho Yu, Hyun-Soo Lee, and Wooyoung Kim; 132 (10), 1114-21 (2006).
Kitinoja, Jari-Pekka
Improving the Safety and Efficiency of Materials Transfer at a Construction Site by Using an Elevator — Pia Perttula, Pekka Korhonen, Jouni Lehtelä, Pirkko-Liisa Rasa, Jari-Pekka Kitinoja, Simo Mäkimattila, and Timo Leskinen; 132 (8), 836-43 (2006).
Kiziltas, Semiha
Modeling and Analyzing the Impact of Technology on Data Capture and Transfer Processes at Construction Sites: A Case Study — Burcu Akinci, Semiha Kiziltas, Esin Ergen, Itir Z. Karaesmen, and Fuat Keceli; 132 (11), 1148-57 (2006).
Klakegg, Ole Jonny
Procurement Routes in Public Building and Construction Projects — Ola Lædre, Kjell Austeng, Tore I. Haugen, and Ole Jonny Klakegg; 132 (7), 689-96 (2006).
Klingler, Mac G.
Systems Analysis of Technical Advancement in Earthmoving Equipment — C. B. Tatum, Michael Vorster, Mac G. Klingler, and Boyd C. Paulson, Jr.; 132 (9), 976-86 (2006).
Innovations in Earthmoving Equipment: New Forms and Their Evolution — C. B. Tatum, Michael Vorster, and Mac Klingler; 132 (9), 987-97 (2006).
Kolera, Bopanna T.
Intelligent Utility Locating Tool for Excavators — Bopanna T. Kolera and Leonhard E. Bernold; 132 (9), 919-27 (2006).
Kolton, O.
Model for Automated Monitoring of Fall Hazards in Building Construction — R. Navon and O. Kolton; 132 (7), 733-40 (2006).
Korhonen, Pekka
Improving the Safety and Efficiency of Materials Transfer at a Construction Site by Using an Elevator — Pia Perttula, Pekka Korhonen, Jouni Lehtelä, Pirkko-Liisa Rasa, Jari-Pekka Kitinoja, Simo Mäkimattila, and Timo Leskinen; 132 (8), 836-43 (2006).
Kuennen, Steven T.
Constructability State of Practice Report — James B. Pocock, Steven T. Kuennen, John Gambatese, and Jon Rauschkolb; 132 (4), 373-83 (2006).
Lædre, Ola
Procurement Routes in Public Building and Construction Projects — Ola Lædre, Kjell Austeng, Tore I. Haugen, and Ole Jonny Klakegg; 132 (7), 689-96 (2006).
Lam, K. C.
Entropy Application to Improve Construction Finance Decisions — C. M. Tang, A. Y. T. Leung, and K. C. Lam; 132 (10), 1099-113 (2006).
Langford, David
Scheduling-Based Risk Estimation and Safety Planning for Construction Projects — Kyoo-Jin Yi and David Langford; 132 (6), 626-35 (2006).
Lapinski, Anthony R.
Lean Processes for Sustainable Project Delivery — Anthony R. Lapinski, Michael J. Horman, and David R. Riley; 132 (10), 1083-91 (2006).
Laufer, Alexander
Only Dynamics Can Absorb Dynamics — Dory Telem, Alexander Laufer, and Aviad Shapira; 132 (11), 1167-77 (2006).
Lee, Dong-Eun
Total Quality Performance of Design/Build Firms Using Quality Function Deployment — Dong-Eun Lee and David Arditi; 132 (1), 49-57 (2006).
Construction Business Automation System — Dong-Eun Lee and Jonathan J. Shi; 132 (1), 88-96 (2006).
Automated Statistical Analysis in Stochastic Project Scheduling Simulation — Dong-Eun Lee and David Arditi; 132 (3), 268-77 (2006).
Lee, Eul-Bum
Fast-Track Urban Freeway Rehabilitation with 55-H Weekend Closures: I-710 Long Beach Case Study — Eul-Bum Lee, Hojung Lee, and John T. Harvey; 132 (5), 465-72 (2006).
Lee, Hojung
Fast-Track Urban Freeway Rehabilitation with 55-H Weekend Closures: I-710 Long Beach Case Study — Eul-Bum Lee, Hojung Lee, and John T. Harvey; 132 (5), 465-72 (2006).
Lee, Hyun-Soo
Evaluation Model for Information Systems Benefits in Construction Management Processes — Jung-Ho Yu, Hyun-Soo Lee, and Wooyoung Kim; 132 (10), 1114-21 (2006).
Lee, SangHyun
Reliability and Stability Buffering Approach: Focusing on the Issues of Errors and Changes in Concurrent Design and Construction Projects — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 132 (5), 452-64 (2006).
Lee, Seung-hyun
Measuring Project Level Productivity on Transportation Projects — Ralph D. Ellis, Jr., and Seung-hyun Lee; 132 (3), 314-20 (2006).
Lehtelä, Jouni
Improving the Safety and Efficiency of Materials Transfer at a Construction Site by Using an Elevator — Pia Perttula, Pekka Korhonen, Jouni Lehtelä, Pirkko-Liisa Rasa, Jari-Pekka Kitinoja, Simo Mäkimattila, and Timo Leskinen; 132 (8), 836-43 (2006).
Leskinen, Timo
Improving the Safety and Efficiency of Materials Transfer at a Construction Site by Using an Elevator — Pia Perttula, Pekka Korhonen, Jouni Lehtelä, Pirkko-Liisa Rasa, Jari-Pekka Kitinoja, Simo Mäkimattila, and Timo Leskinen; 132 (8), 836-43 (2006).
Leung, A. Y. T.
Entropy Application to Improve Construction Finance Decisions — C. M. Tang, A. Y. T. Leung, and K. C. Lam; 132 (10), 1099-113 (2006).
Li, Heng
Particle Swarm Optimization for Preemptive Scheduling under Break and Resource-Constraints — Hong Zhang, Heng Li, and C. M. Tam; 132 (3), 259-67 (2006).
Discussion of "Risks in Chinese Construction Market—Contractors' Perspective" by Dongping Fang, Mingen Li, Patrick Sik-wah Fong, and Liyin Shen — Zhen Chen and Heng Li; 132 (3), 327-8 (2006).
Job Performance Evaluation for Construction Companies: An Analytic Network Process Approach — Eddie W. L. Cheng and Heng Li; 132 (8), 827-35 (2006).
Discussion of "Waste-Based Management in Residential Construction" by Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold — Zhen Chen, Heng Li, and Andrew N. Baldwin; 132 (9), 1019 (2006).
Particle Swarm Optimization-Supported Simulation for Construction Operations — Hong Zhang, C. M. Tam, Heng Li, and Jonathan Jingsheng Shi; 132 (12), 1267-74 (2006).
Li, J.
Forecasting Project Status by Using Fuzzy Logic — J. Li, O. Moselhi, and S. Alkass; 132 (11), 1193-202 (2006).
Li, Mingen
Closure to "Risks in Chinese Construction Market—Contractors' Perspective" by Dongping Fang, Mingen Li, Patrick Sik-wah Fong, and Liyin Shen — Dongping Fang, Difei Zhu, Patrick Sik-wah Fong, Mingen Li, and Liyin Shen; 132 (3), 328-9 (2006).
Li, Sherman
Developing a Resource Supply Chain Planning System for Construction Projects — H. Ping Tserng, Samuel Y. L. Yin, and Sherman Li; 132 (4), 393-407 (2006).
Ling, Florence Yean Yng
Determinants of International Architectural, Engineering, and Construction Firms' Project Suc-

cess in China — Florence Yean Yng Ling, C. William Ibbs, and Wei Yee Hoo; 132 (2), 206-14 (2006).

Ling, Yean Yng

Closure to "Modeling a Contractor's Markup Estimation" by Min Liu and Yean Yng Ling — Min Liu and Yean Yng Ling; 132 (6), 661-3 (2006).

Liu, Chunlu

Discussion of "Modeling a Contractor's Markup Estimation" by Min Liu and Yean Yng Ling — Min Wu, Chunlu Liu, and David Picken; 132 (6), 658-61 (2006).

Liu, L.

Discussion of "Determination of Haul Distance and Direction in Mass Excavation" by Jaeho Son, Kris G. Mattila, and Donald S. Myers — W. F. Cheng, L. Liu, and M. G. Satish; 132 (8), 895-6 (2006).

Liu, Liang Y.

Integration of Construction As-Built Data Via Laser Scanning with Geotechnical Monitoring of Urban Excavation — Y. Y. Su, Y. M. A. Hashash, and L. Y. Liu; 132 (12), 1234-41 (2006).

Multiproject Planning and Resource Controls for Facility Management — E. William East and Liang Y. Liu; 132 (12), 1294-305 (2006).

Liu, Min

Closure to "Modeling a Contractor's Markup Estimation" by Min Liu and Yean Yng Ling — Min Liu and Yean Yng Ling; 132 (6), 661-3 (2006).

Lo, Tommy Y.

Construction Delays in Hong Kong Civil Engineering Projects — Tommy Y. Lo, Ivan W. H. Fung, and Karen C. F. Tung; 132 (6), 636-49 (2006).

Lopez, Ramon

Modeling Cost Escalation in Large Infrastructure Projects — Ali Touran and Ramon Lopez; 132 (8), 853-60 (2006).

Lowe, David J.

Predicting Construction Cost Using Multiple Regression Techniques — David J. Lowe, Margaret W. Emsley, and Anthony Harding; 132 (7), 750-8 (2006).

Lu, Ming

Discussion of "Critical Path Method with Multiple Calendars" by Kyunghwan Kim and Jesús M. de la Garza — Ming Lu; 132 (5), 540-1 (2006).

Discussion of "Evaluation of the Resource-Constrained Critical Path Method Algorithms" by Kyunghwan Kim and Jesús M. de la Garza — Ming Lu; 132 (10), 1126-7 (2006).

Application Framework for Mapping and Simulation of Waste Handling Processes in Construction — Ming Lu, Chi-Sun Poon, and Lap-Chi Wong; 132 (11), 1212-21 (2006).

Lu, Wei-Sheng

Contractor Key Competitiveness Indicators: A China Study — Li-Yin Shen, Wei-Sheng Lu, and Michael C. H. Yam; 132 (4), 416-24 (2006).

Lucko, Gunnar

Statistical Considerations for Predicting Residual Value of Heavy Equipment — Gunnar Lucko, Christine M. Anderson-Cook, and Michael C. Vorster; 132 (7), 723-32 (2006).

Maheswari, J. Uma

Application of Dependency Structure Matrix for Activity Sequencing in Concurrent Engineering Projects — J. Uma Maheswari, Koshy Varghese, and T. Sridharan; 132 (5), 482-90 (2006).

Mäkimattila, Simo

Improving the Safety and Efficiency of Materials Transfer at a Construction Site by Using an Elevator — Pia Perttula, Pekka Korhonen, Jouni Lehtelä, Pirkko-Liisa Rasa, Jari-Pekka Kitinoja, Simo Mäkimattila, and Timo Leskinen; 132 (8), 836-43 (2006).

Mattila, Kris

Closure to "Determination of Haul Distance and Direction in Mass Excavation" by Jaeho Son, Kris G. Mattila, and Donald S. Myers — Jaeho Son and Kris Mattila; 132 (8), 897 (2006).

Menches, Cindy L.

Quantitative Measurement of Successful Performance from the Project Manager's Perspective — Cindy L. Menches and Awad S. Hanna; 132 (12), 1284-93 (2006).

Conceptual Planning Process for Electrical Construction — Cindy L. Menches and Awad S. Hanna; 132 (12), 1306-13 (2006).

Messner, John I.

Comparing Procurement Methods for Design-Build Projects — Marwa A. El Wardani, John I. Messner, and Michael J. Horman; 132 (3), 230-8 (2006).

Minchin, R. Edward, Jr.

Firm Performance and Information Technology Utilization in the Construction Industry — Mohammad El-Mashaleh, William J. O'Brien, and R. Edward Minchin, Jr.; 132 (5), 499-507 (2006).

Minkarah, Issam

Warranty Bonds from the Perspective of Surety Companies — Mehmet Emre Bayraktar, Qingbin Cui, Makarand Hastak, and Issam Minkarah; 132 (4), 333-7 (2006).

Miresco, Edmond

Discussion of "Critical Path Method with Multiple Calendars" by Kyunghwan Kim and Jesús M. de la Garza — Adel Francis and Edmond Miresco; 132 (5), 542-3 (2006).

Mohamed, O.

Delay Mitigation in the Malaysian Construction Industry — H. Abdul-Rahman, M. A. Berawi, A. R. Berawi, O. Mohamed, M. Othman, and I. A. Yahya; 132 (2), 125-33 (2006).

Mohamed, Yasser

Application of Lean Concepts and Simulation Analysis to Improve Efficiency of Drainage Operations Maintenance Crews — Albert Agbulos, Yasser Mohamed, Mohamed Al-Hussein, Simaan AbouRizk, and John Roesch; 132 (3), 291-9 (2006).

Bayesian Updating Application into Simulation in the North Edmonton Sanitary Trunk Tunnel Project — Tae Hwan Chung, Yasser Mohamed, and Simaan AbouRizk; 132 (8), 882-94 (2006).

Mok, Fung Man

Logistic Likelihood Analysis of Mediation Outcomes — Tak Wing Yiu, Sai On Cheung, and Fung Man Mok; 132 (10), 1026-36 (2006).

Moore, J. R.

Crane-Related Fatalities in the Construction Industry — J. E. Beavers, J. R. Moore, R. Rinehart, and W. R. Schriver; 132 (9), 901-10 (2006).

Morton, David P.

Linear Programming Approach to Optimize Strategic Investment in the Construction Workforce — Issam M. Srour, Carl T. Haas, and David P. Morton; 132 (11), 1158-66 (2006).

Moselhi, Osama

Computer-Aided Site Layout Planning — Farnaz Sadeghpour, Osama Moselhi, and Sabah T. Alkass; 132 (2), 143-51 (2006).

Forecasting Project Status by Using Fuzzy Logic — J. Li, O. Moselhi, and S. Alkass; 132 (11), 1193-202 (2006).

Moussa, Mohamed

Decision Tree Modeling Using Integrated Multilevel Stochastic Networks — Mohamed Moussa, Janaka Ruwanpura, and George Jergeas; 132 (12), 1254-66 (2006).

Mullens, Michael A.

Structural Insulated Panels: Impact on the Residential Construction Process — Michael A. Mullens and Mohammed Arif; 132 (7), 786-94 (2006).

Na, Lim Jay

Stimulating Construction Innovation in Singapore through the National System of Innovation — Lim Jay Na, George Ofori, and Moonseo Park; 132 (10), 1069-82 (2006).

Nash, Phillip T.

Lessons Learned from an Emergency Bridge Replacement Project — Yong Bai, William R. Burkett, and Phillip T. Nash; 132 (4), 338-44 (2006).

Nassar, Khaled M.

Developing a Complexity Measure for Project Schedules — Khaled M. Nassar and Mohamed Y. Hegab; 132 (6), 554-61 (2006).

Navon, R.

Model for Automated Monitoring of Fall Hazards in Building Construction — R. Navon and O. Kolton; 132 (7), 733-40 (2006).

Nepal, Madhav Prasad

Effects of Schedule Pressure on Construction Performance — Madhav Prasad Nepal, Moonseo Park, and Bosik Son; 132 (2), 182-8 (2006).

Nitithamyong, Pollaphat

Success/Failure Factors and Performance Measures of Web-Based Construction Project Management Systems: Professionals' Viewpoint — Pollaphat Nitithamyong and Mirosław J. Skibniewski; 132 (1), 80-7 (2006).

North, Steve

Critical Space Analysis — Graham M. Winch and Steve North; 132 (5), 473-81 (2006).

Nuntasunti, Suchart

Experimental Assessment of Wireless Construction Technologies — Suchart Nuntasunti and Leonhard E. Bernold; 132 (9), 1009-18 (2006).

O'Brien, William J.

Firm Performance and Information Technology Utilization in the Construction Industry — Mohammad El-Mashaleh, William J. O'Brien, and R. Edward Minchin, Jr.; 132 (5), 499-507 (2006).

O'Connor, James T.

Crew Production Rates for Contract Time Estimation: Beam Erection, Deck, and Rail of Highway Bridges — James T. O'Connor and Youngki Huh; 132 (4), 408-15 (2006).

Odeyinka, Henry Agboola

Construction Delays and Their Causative Factors in Nigeria — Ajibade Ayodeji Aibinu and Henry Agboola Odeyinka; 132 (7), 667-77 (2006).

Ofori, George

Stimulating Construction Innovation in Singapore through the National System of Innovation — Lim Jay Na, George Ofori, and Moonseo Park; 132 (10), 1069-82 (2006).

Orosz, Matthew P.
Sequence Planning for Electrical Construction — Michael J. Horman, Matthew P. Orosz, and David R. Riley; 132 (4), 363-72 (2006).
Ossman, Chip
Discussion of "Cumulative Effect of Project Changes for Electrical and Mechanical Construction" by Awad S. Hanna, Richard Camlic, Pehr A. Peterson, and Min-Jae Lee — Chip Ossman; 132 (5), 543-5 (2006).
Othman, M.
Delay Mitigation in the Malaysian Construction Industry — H. Abdul-Rahman, M. A. Berawi, A. R. Berawi, O. Mohamed, M. Othman, and I. A. Yahya; 132 (2), 125-33 (2006).
Oyetunji, Adetokunbo A.
Relative Effectiveness of Project Delivery and Contract Strategies — Adetokunbo A. Oyetunji and Stuart D. Anderson; 132 (1), 3-13 (2006).
Ozorhon, Beliz
Case-Based Reasoning Model for International Market Selection — Beliz Ozorhon, Irem Dikmen, and M. Talat Birgonul; 132 (9), 940-8 (2006).
Park, Moonseo
Effects of Schedule Pressure on Construction Performance — Madhav Prasad Nepal, Moonseo Park, and Bosik Son; 132 (2), 182-8 (2006).
Reliability and Stability Buffering Approach: Focusing on the Issues of Errors and Changes in Concurrent Design and Construction Projects — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 132 (5), 452-64 (2006).
Stimulating Construction Innovation in Singapore through the National System of Innovation — Lim Jay Na, George Ofori, and Moonseo Park; 132 (10), 1069-82 (2006).
Paulson, Boyd C., Jr.
Systems Analysis of Technical Advancement in Earthmoving Equipment — C. B. Tatum, Michael Vorster, Mac G. Klingler, and Boyd C. Paulson Jr.; 132 (9), 976-86 (2006).
Peña-Mora, Feniosky
Reliability and Stability Buffering Approach: Focusing on the Issues of Errors and Changes in Concurrent Design and Construction Projects — SangHyun Lee, Feniosky Peña-Mora, and Moonseo Park; 132 (5), 452-64 (2006).
Perng, Yeng-Horng
Exploring the Bidding Situation for Economically Most Advantageous Tender Projects Using a Bidding Game — Yeng-Horng Perng, Yi-Kai Juan, and Sheng-Fen Chien; 132 (10), 1037-42 (2006).
Perttula, Pia
Improving the Safety and Efficiency of Materials Transfer at a Construction Site by Using an Elevator — Pia Perttula, Pekka Korhonen, Jouni Lehtelä, Pirkko-Liisa Rasa, Jari-Pekka Kitinoja, Simo Mäkimattila, and Timo Leskinen; 132 (8), 836-43 (2006).
Picken, David
Discussion of "Modeling a Contractor's Markup Estimation" by Min Liu and Yean Yng Ling — Min Wu, Chunlu Liu, and David Picken; 132 (6), 658-61 (2006).
Pocock, James B.
Constructability State of Practice Report — James B. Pocock, Steven T. Kuennen, John Gambatese, and Jon Rauschkolb; 132 (4), 373-83 (2006).
Poon, Chi-Sun
Application Framework for Mapping and Simulation of Waste Handling Processes in Construction — Ming Lu, Chi-Sun Poon, and Lap-Chi Wong; 132 (11), 1212-21 (2006).
Price, A. D. F.
Empirical Evaluation of Structural Frame Performance Criteria: Realizing the Potential of Hybrid Concrete Construction — R. Soetanto, A. R. J. Dainty, J. Glass, and A. D. F. Price; 132 (3), 278-90 (2006).
Puddicombe, Michael S.
The Limitations of Planning: The Importance of Learning — Michael S. Puddicombe; 132 (9), 949-55 (2006).
Rasa, Pirkko-Liisa
Improving the Safety and Efficiency of Materials Transfer at a Construction Site by Using an Elevator — Pia Perttula, Pekka Korhonen, Jouni Lehtelä, Pirkko-Liisa Rasa, Jari-Pekka Kitinoja, Simo Mäkimattila, and Timo Leskinen; 132 (8), 836-43 (2006).
Rauschkolb, Jon
Constructability State of Practice Report — James B. Pocock, Steven T. Kuennen, John Gambatese, and Jon Rauschkolb; 132 (4), 373-83 (2006).
Reinschmidt, Kenneth
Economic Value of Building Faster — Kenneth Reinschmidt and David Trejo; 132 (7), 759-66 (2006).
Rezgui, Yacine
Paving the Way to the Vision of Digital Construction: A Strategic Roadmap — Yacine Rezgui and Alain Zarli; 132 (7), 767-76 (2006).
Ries, Robert
Construction Delivery Systems: A Comparative Analysis of Their Performance within School Districts — David Col Debella and Robert Ries; 132 (11), 1131-8 (2006).
Riley, David R.
Sequence Planning for Electrical Construction — Michael J. Horman, Matthew P. Orosz, and David R. Riley; 132 (4), 363-72 (2006).
Lean Processes for Sustainable Project Delivery — Anthony R. Lapinski, Michael J. Horman, and David R. Riley; 132 (10), 1083-91 (2006).
Rinehart, R.
Crane-Related Fatalities in the Construction Industry — J. E. Beavers, J. R. Moore, R. Rinehart, and W. R. Schriver; 132 (9), 901-10 (2006).
Roesch, John
Application of Lean Concepts and Simulation Analysis to Improve Efficiency of Drainage Operations Maintenance Crews — Albert Agbulos, Yasser Mohamed, Mohamed Al-Hussein, Simaan AbouRizk, and John Roesch; 132 (3), 291-9 (2006).
Ruwanpura, Janaka
Decision Tree Modeling Using Integrated Multilevel Stochastic Networks — Mohamed Moussa, Janaka Ruwanpura, and George Jergeas; 132 (12), 1254-66 (2006).
Sadeghpour, Farnaz
Computer-Aided Site Layout Planning — Farnaz Sadeghpour, Osama Moselhi, and Sabah T. Alkass; 132 (2), 143-51 (2006).
Salem, Ossama M.
Soil Penetration Modeling in Microtunneling Projects — Mohamed Hegab, Gary R. Smith, and Ossama M. Salem; 132 (6), 598-605 (2006).
Satish, M. G.
Discussion of "Determination of Haul Distance and Direction in Mass Excavation" by Jaeho Son, Kris G. Mattila, and Donald S. Myers — W. F. Cheng, L. Liu, and M. G. Satish; 132 (8), 895-6 (2006).
Schexnayder, Cliff J.
Moving a Reinforced-Concrete Building: Case Study — Dory Telem, Aviad Shapira, Ytzhak D. Goren, and Cliff J. Schexnayder; 132 (2), 115-24 (2006).
Schriver, W. R.
Crane-Related Fatalities in the Construction Industry — J. E. Beavers, J. R. Moore, R. Rinehart, and W. R. Schriver; 132 (9), 901-10 (2006).
Shapira, Aviad
Moving a Reinforced-Concrete Building: Case Study — Dory Telem, Aviad Shapira, Ytzhak D. Goren, and Cliff J. Schexnayder; 132 (2), 115-24 (2006).
Only Dynamics Can Absorb Dynamics — Dory Telem, Alexander Laufer, and Aviad Shapira; 132 (11), 1167-77 (2006).
Sharara, Lokman M.
Neural Networks for Estimating the Productivity of Concreting Activities — A. Samer Ezeldin and Lokman M. Sharara; 132 (6), 650-6 (2006).
Sharma, Vishal
Residential Construction Lot Grading Approval Process Optimization: Case Study of City of Edmonton — Vishal Sharma, Mohamed Al-Hussein, and Simaan M. AbouRizk; 132 (12), 1225-33 (2006).
Shen, Li Yin
Closure to "Risks in Chinese Construction Market—Contractors' Perspective" by Dongping Fang, Mingen Li, Patrick Sik-wah Fong, and Liyin Shen — Dongping Fang, Difei Zhu, Patrick Sik-wah Fong, Mingen Li, and Liyin Shen; 132 (3), 328-9 (2006).
Contractor Key Competitiveness Indicators: A China Study — Li-Yin Shen, Wei-Sheng Lu, and Michael C. H. Yam; 132 (4), 416-24 (2006).
Strengths, Weaknesses, Opportunities, and Threats for Foreign-Invested Construction Enterprises: A China Study — Li Yin Shen, Zhen Yu Zhao, and Derek S. Drew; 132 (9), 966-75 (2006).
Shen, Qiping
Investigation of Critical Success Factors in Construction Project Briefing by Way of Content Analysis — Ann T. W. Yu, Qiping Shen, John Kelly, and Kirsty Hunter; 132 (11), 1178-86 (2006).
Shi, Jonathan Jingsheng
Construction Business Automation System — Dong-Eun Lee and Jonathan J. Shi; 132 (1), 88-96 (2006).
Particle Swarm Optimization-Supported Simulation for Construction Operations — Hong Zhang, C. M. Tam, Heng Li, and Jonathan Jingsheng Shi; 132 (12), 1267-74 (2006).
Shih, Naai-Jung
3D Scan Information Management System for Construction Management — Naai-Jung Shih and Sen-Tien Huang; 132 (2), 134-42 (2006).
Shohet, Igal M.
Key Performance Indicators for Strategic Healthcare Facilities Maintenance — Igal M. Shohet; 132 (4), 345-52 (2006).

Singh, D.
Contractor Selection Criteria: Investigation of Opinions of Singapore Construction Practitioners — D. Singh and Robert L. K. Tiong; 132 (9), 998-1008 (2006).
Skibniewski, Mirosław J.
Success/Failure Factors and Performance Measures of Web-Based Construction Project Management Systems: Professionals' Viewpoint — Pollaphat Nitithamyong and Mirosław J. Skibniewski; 132 (1), 80-7 (2006).
Skitmore, Martin
Testing Vickery's Revenue Equivalence Theory in Construction Auctions — Derek S. Drew and Martin Skitmore; 132 (4), 425-8 (2006).
Smith, Gary R.
Soil Penetration Modeling in Microtunneling Projects — Mohamed Hegab, Gary R. Smith, and Ossama M. Salem; 132 (6), 598-605 (2006).
Smith, Simon D.
Safety Hazard Identification on Construction Projects — Gregory Carter and Simon D. Smith; 132 (2), 197-205 (2006).
Sobotka, Anna
Scheduling Construction Projects Using Evolutionary Algorithm — Piotr Jaśkowski and Anna Sobotka; 132 (8), 861-70 (2006).
Soetanto, R.
Empirical Evaluation of Structural Frame Performance Criteria: Realizing the Potential of Hybrid Concrete Construction — R. Soetanto, A. R. J. Dainty, J. Glass, and A. D. F. Price; 132 (3), 278-90 (2006).
Soibelman, Lucio
Multimodal Image Retrieval from Construction Databases and Model-Based Systems — Ioannis Brilakis and Lucio Soibelman; 132 (7), 777-85 (2006).
Son, Bosik
Effects of Schedule Pressure on Construction Performance — Madhav Prasad Nepal, Moonseo Park, and Bosik Son; 132 (2), 182-8 (2006).
Son, Jaeho
Closure to "Determination of Haul Distance and Direction in Mass Excavation" by Jaeho Son, Kris G. Mattila, and Donald S. Myers — Jaeho Son and Kris Mattila; 132 (8), 897 (2006).
Song, Jongchul
Tracking the Location of Materials on Construction Job Sites — Jongchul Song, Carl T. Haas, and Carlos H. Caldas; 132 (9), 911-8 (2006).
Song, Yuanbin
Modeling of Functional Construction Requirements for Constructability Analysis — Yuanbin Song and David K. H. Chua; 132 (12), 1314-26 (2006).
Spielholz, Peregrin
Physical Risk Factors and Controls for Musculoskeletal Disorders in Construction Trades — Peregrin Spielholz, Gary Davis, and Jason Griffith; 132 (10), 1059-68 (2006).
Sridharan, T.
Application of Dependency Structure Matrix for Activity Sequencing in Concurrent Engineering Projects — J. Uma Maheswari, Koshy Varghese, and T. Sridharan; 132 (5), 482-90 (2006).
Srour, Issam M.
What Does the Construction Industry Value in Its Workers? — Issam M. Srour, Carl T. Haas, and John D. Borcherding; 132 (10), 1053-8 (2006).
Linear Programming Approach to Optimize Strategic Investment in the Construction Workforce — Issam M. Srour, Carl T. Haas, and David P. Morton; 132 (11), 1158-66 (2006).
Su, Huaizhi
Management and Construction of the Three Gorges Project — Huichao Dai, Guangjing Cao, and Huaizhi Su; 132 (6), 615-9 (2006).
Su, Y. Y.
Integration of Construction As-Built Data Via Laser Scanning with Geotechnical Monitoring of Urban Excavation — Y. Y. Su, Y. M. A. Hashash, and L. Y. Liu; 132 (12), 1234-41 (2006).
Suen, Henry C. H.
MAUT-Based Dispute Resolution Selection Model Prototype for International Construction Projects — Edwin H. W. Chan, Henry C. H. Suen, and Charles K. L. Chan; 132 (5), 444-51 (2006).
Sun, Kuo-Shun
Non-Unit-Based Planning and Scheduling of Repetitive Construction Projects — Rong-yau Huang and Kuo-Shun Sun; 132 (6), 585-97 (2006).
Tam, C. M.
Particle Swarm Optimization for Preemptive Scheduling under Break and Resource-Constraints — Hong Zhang, Heng Li, and C. M. Tam; 132 (3), 259-67 (2006).
Particle Swarm Optimization-Supported Simulation for Construction Operations — Hong Zhang, C. M. Tam, Heng Li, and Jonathan Jingsheng Shi; 132 (12), 1267-74 (2006).
Tang, C. M.
Entropy Application to Improve Construction Finance Decisions — C. M. Tang, A. Y. T. Leung, and K. C. Lam; 132 (10), 1099-113 (2006).
Tang, Wenzhe
Partnering Mechanism in Construction: An Empirical Study on the Chinese Construction Industry — Wenzhe Tang, Colin F. Duffield, and David M. Young; 132 (3), 217-29 (2006).
Tatum, C. B.
Systems Analysis of Technical Advancement in Earthmoving Equipment — C. B. Tatum, Michael Vorster, Mac G. Klingler, and Boyd C. Paulson Jr.; 132 (9), 976-86 (2006).
Innovations in Earthmoving Equipment: New Forms and Their Evolution — C. B. Tatum, Michael Vorster, and Mac Klingler; 132 (9), 987-97 (2006).
Telem, Dory
Moving a Reinforced-Concrete Building: Case Study — Dory Telem, Aviad Shapira, Ytzhak D. Goren, and Cliff J. Schexnayder; 132 (2), 115-24 (2006).
Only Dynamics Can Absorb Dynamics — Dory Telem, Alexander Laufer, and Aviad Shapira; 132 (11), 1167-77 (2006).
Thomas, H. Randolph
Fundamental Principles of Workforce Management — H. Randolph Thomas and Michael J. Horman; 132 (1), 97-104 (2006).
Tiong, Robert L. K.
Contractor Selection Criteria: Investigation of Opinions of Singapore Construction Practitioners — D. Singh and Robert L. K. Tiong; 132 (9), 998-1008 (2006).
Torrent, David Grau
Using Global Positioning System to Improve Materials-Locating Processes on Industrial Projects — Carlos H. Caldas, David Grau Torrent, and Carl T. Haas; 132 (7), 741-9 (2006).
Touran, Ali
Modeling Cost Escalation in Large Infrastructure Projects — Ali Touran and Ramon Lopez; 132 (8), 853-60 (2006).
Trejo, David
Economic Value of Building Faster — Kenneth Reinschmidt and David Trejo; 132 (7), 759-66 (2006).
Tserng, H. Ping
Object-Oriented Scheduling for Repetitive Projects with Soft Logics — Su-Ling Fan and H. P. Tserng; 132 (1), 35-48 (2006).
Developing a Resource Supply Chain Planning System for Construction Projects — H. Ping Tserng, Samuel Y. L. Yin, and Sherman Li; 132 (4), 393-407 (2006).
Tung, Karen C. F.
Construction Delays in Hong Kong Civil Engineering Projects — Tommy Y. Lo, Ivan W. H. Fung, and Karen C. F. Tung; 132 (6), 636-49 (2006).
Usmen, Mumtaz A.
Comparative Injury and Fatality Risk Analysis of Building Trades — Selim Baradan and Mumtaz A. Usmen; 132 (5), 533-9 (2006).
Uwakweh, Benjamin Obinero
Motivational Climate of Construction Apprentice — Benjamin Obinero Uwakweh; 132 (5), 525-32 (2006).
Vanhoucke, Mario
Work Continuity Constraints in Project Scheduling — Mario Vanhoucke; 132 (1), 14-25 (2006).
Varghese, Koshy
Application of Dependency Structure Matrix for Activity Sequencing in Concurrent Engineering Projects — J. Uma Maheswari, Koshy Varghese, and T. Sridharan; 132 (5), 482-90 (2006).
Vorster, Michael C.
Statistical Considerations for Predicting Residual Value of Heavy Equipment — Gunnar Lucko, Christine M. Anderson-Cook, and Michael C. Vorster; 132 (7), 723-32 (2006).
Systems Analysis of Technical Advancement in Earthmoving Equipment — C. B. Tatum, Michael Vorster, Mac G. Klingler, and Boyd C. Paulson Jr.; 132 (9), 976-86 (2006).
Innovations in Earthmoving Equipment: New Forms and Their Evolution — C. B. Tatum, Michael Vorster, and Mac Klingler; 132 (9), 987-97 (2006).
Waara, F.
Price and Nonprice Criteria for Contractor Selection — F. Waara and J. Bröchner; 132 (8), 797-804 (2006).
Walters, Russell C.
Approaches to Improving the Quality of Construction Drawings from Owner's Perspective — Zhili Gao, Russell C. Walters, Edward J. Jaselskis, and Terry J. Wipf; 132 (11), 1187-92 (2006).
Construction IT Decision Making Using Multiattribute Utility Theory for Use in a Laboratory Information Management System — Tarek Elmisalami, Russell Walters, and Edward J. Jaselskis; 132 (12), 1275-83 (2006).

Wibowo, Andreas
CAPM-Based Valuation of Financial Government Supports to Infeasible and Risky Private Infrastructure Projects — Andreas Wibowo; 132 (3), 239-48 (2006).
Winch, Graham M.
Critical Space Analysis — Graham M. Winch and Steve North; 132 (5), 473-81 (2006).
Wipf, Terry J.
Approaches to Improving the Quality of Construction Drawings from Owner's Perspective — Zhili Gao, Russell C. Walters, Edward J. Jaselskis, and Terry J. Wipf; 132 (11), 1187-92 (2006).
Wong, Lap-Chi
Application Framework for Mapping and Simulation of Waste Handling Processes in Construction — Ming Lu, Chi-Sun Poon, and Lap-Chi Wong; 132 (11), 1212-21 (2006).
Wong, Louisa
Safety Climate in Construction Industry: A Case Study in Hong Kong — Dongping Fang, Yang Chen, and Louisa Wong; 132 (6), 573-84 (2006).
Wu, Min
Discussion of "Modeling a Contractor's Markup Estimation" by Min Liu and Yean Yng Ling — Min Wu, Chunlu Liu, and David Picken; 132 (6), 658-61 (2006).
Yahya, I. A.
Delay Mitigation in the Malaysian Construction Industry — H. Abdul-Rahman, M. A. Berawi, A. R. Berawi, O. Mohamed, M. Othman, and I. A. Yahya; 132 (2), 125-33 (2006).
Yam, Michael C. H.
Contractor Key Competitiveness Indicators: A China Study — Li-Yin Shen, Wei-Sheng Lu, and Michael C. H. Yam; 132 (4), 416-24 (2006).
Yang, Min-Lung
Innovative Central Opening Strut System for Foundation Excavation — Min-Lung Yang, Sheng-Jin Chen, and Shun-Tyan Chen; 132 (1), 58-66 (2006).
Yeung, Sau Fung
A Study of Styles and Outcomes in Construction Dispute Negotiation — Sai On Cheung, Tak Wing Yiu Yiu, and Sau Fung Yeung; 132 (8), 805-14 (2006).
Yi, Kyoo-Jin
Scheduling-Based Risk Estimation and Safety Planning for Construction Projects — Kyoo-Jin Yi and David Langford; 132 (6), 626-35 (2006).
Yin, Samuel Yen-Liang
Developing a Resource Supply Chain Planning System for Construction Projects — H. Ping Tserng, Samuel Y. L. Yin, and Sherman Li; 132 (4), 393-407 (2006).
Need for Global Knowledge Sharing Related to Construction Innovation — Samuel Yen-Liang Yin; 132 (10), 1025 (2006).
Yiu, Tak Wing
Logistic Likelihood Analysis of Mediation Outcomes — Tak Wing Yiu, Sai On Cheung, and Fung Man Mok; 132 (10), 1026-36 (2006).
Yiu, Kenneth T. W.
A Study of Styles and Outcomes in Construction Dispute Negotiation — Sai On Cheung, Tak Wing Yiu Yiu, and Sau Fung Yeung; 132 (8), 805-14 (2006).
Young, David M.
Partnering Mechanism in Construction: An Empirical Study on the Chinese Construction Industry — Wenzhe Tang, Colin F. Duffield, and David M. Young; 132 (3), 217-29 (2006).
Yu, Ann T. W.
Investigation of Critical Success Factors in Construction Project Briefing by Way of Content Analysis — Ann T. W. Yu, Qiping Shen, John Kelly, and Kirsty Hunter; 132 (11), 1178-86 (2006).
Yu, Jung-Ho
Evaluation Model for Information Systems Benefits in Construction Management Processes — Jung-Ho Yu, Hyun-Soo Lee, and Wooyoung Kim; 132 (10), 1114-21 (2006).
Zarli, Alain
Paving the Way to the Vision of Digital Construction: A Strategic Roadmap — Yacine Rezgui and Alain Zarli; 132 (7), 767-76 (2006).
Zhang, Hong
Particle Swarm Optimization for Preemptive Scheduling under Break and Resource-Constraints — Hong Zhang, Heng Li, and C. M. Tam; 132 (3), 259-67 (2006).
Particle Swarm Optimization-Supported Simulation for Construction Operations — Hong Zhang, C. M. Tam, Heng Li, and Jonathan Jingsheng Shi; 132 (12), 1267-74 (2006).
Zhang, J.
Constructability Analysis of the Bridge Superstructure Rotation Construction Method in China — J. Zhang and T. E. El-Diraby; 132 (4), 353-62 (2006).
Zhang, Jing
Closure to "Waste-Based Management in Residential Construction" by Jing Zhang, Danelle L. Eastham, and Leonhard E. Bernold — Jing Zhang, Danelle L. Eastham (Ralph), and Leonhard E. Bernold; 132 (9), 1019-21 (2006).
Zhang, Xueqing
Public Clients' Best Value Perspectives of Public Private Partnerships in Infrastructure Development — Xueqing Zhang; 132 (2), 107-14 (2006).
Factor Analysis of Public Clients' Best-Value Objective in Public–Privately Partnered Infrastructure Projects — Xueqing Zhang; 132 (9), 956-65 (2006).
Markov-Based Optimization Model for Building Facilities Management — Xueqing Zhang; 132 (11), 1203-11 (2006).
Zhao, Tong
Infrastructure Development and Expansion under Uncertainty: A Risk-Preference-Based Lattice Approach — Tong Zhao and Chung C. Fu; 132 (6), 620-5 (2006).
Zhao, Zhen Yu
Strengths, Weaknesses, Opportunities, and Threats for Foreign-Invested Construction Enterprises: A China Study — Li Yin Shen, Zhen Yu Zhao, and Derek S. Drew; 132 (9), 966-75 (2006).
Zhu, Difei
Closure to "Risks in Chinese Construction Market—Contractors' Perspective" by Dongping Fang, Mingen Li, Patrick Sik-wah Fong, and Liyin Shen — Dongping Fang, Difei Zhu, Patrick Sik-wah Fong, Mingen Li, and Liyin Shen; 132 (3), 328-9 (2006).
